Key Change

- In 2024, the **Policy Officer** (Kevin Turnage) was explicitly required to approve policies.
- In 2025, authored by the same official (CQO Pope), the **Policy Officer was removed from the workflow**, stripping approval authority.

Significance

- The Policy Officer's approval authority was **formally granted by management** in 2024, not self-assigned.
- The same management official then deliberately **removed this authority** in 2025, materially diminishing the position's core duties.
- This change directly conflicted with the PD requirement to *"develop new policies or revise current policies to ensure that the organization is compliant."*
