Subject: RE: Schedule for today Monday 03/20/2023
Date: Tuesday, March 21, 2023 at 8:43:05 AM Mountain Standard Time
From: Greve, Tonie (IHS/PHX)
To: Turnage, Kevin D. (IHS/PHX)
CC: White, Jason (IHS/PHX/PIMC)

Good Morning Kevin;

Who will I be working with today?
I completed the pre-visit planning for Tsingine went to huddle told Mary is working with her. I did the pre-visit planning for the clinic today and gave it to Mary the Float RN to review to help for the day.

Will I be assigned to another doctor, so I can get started on the pre-visit planning?

Thank you
Tonie

Date: Thursday, February 16, 2023 at 8:12:52 AM Mountain Standard Time
From: Greve, Tonie (IHS/PHX)
To: Turnage, Kevin D. (IHS/PHX)
CC: Baek, Aimee (IHS/PHX)

Good Morning Team Leaders;

I have a question.

I have (2) new clients that were established a PCP with 1 provider then changed to be with another the same doctor due to being family in July 2022.
Now I received a request to change PCP again.

Do I go ahead and change per request? I thought they stayed 1 year maybe I am wrong?

Thank you for your assistance with this.

Subject: RE: covid swabs

Hi Brenda,

There is no plan for the lab to take over covid swabs. As we complete other swabs in clinic (strep, flu) I don't foresee the lab taking this function over.

We can alert the front desk to make sure they are picking up the calls that come through. Or, we can change the number on the parking signs to show the nurse triage room instead?

All covid results should be conveyed by the PHNs who are supplying letters if patients request them. If the patient needs a result on the letter, the provider who completed the phone appt won't be able to know this ahead of time.

Cc: Hill, Elizabeth I (IHS/PHX) <Elizabeth.Hill@ihs.gov>; Frost, Arlene (IHS/PHX/PIMC) [C] <Arlene.Frost@ihs.gov>; Edison, Bertha (IHS/PHX) <Bertha.Edison@ihs.gov>; Greve, Tonie (IHS/PHX) <Tonie.Greve@ihs.gov>
Subject: covid swabs

There are a few issues with the covid swabs. First is the front desk at 6701 does not answer the phone when the patient calls and the patient ends up having to call the call center. Today the patient waited 45 minutes before I was notified. Second the patient always asks for an excuse or proof or test. Can the provider offer this during the phone appointment?

Will the main lab be taking over the covid swabs since we are green level now?

Thanks…Brenda

Subject: covid swabs

There are a few issues with the covid swabs. First is the front desk at 6701 does not answer the phone when the patient calls and the patient ends up having to call the call center. Today the patient waited 45 minutes before I was notified. Second the patient always asks for an excuse or proof or test. Can the provider offer this during the phone appointment?

Will the main lab be taking over the covid swabs since we are green level now?

Thanks…Brenda

Subject: Sharing Information

Good Morning all team members;

I wanted to take time to share that when you are sending ROI for the mammogram reports from Solis Mammography, it needs to go to Solis Medical Records Fax: 469-708-4600.
PRC has a fax listed in the PRC/Referral/Rcis note, but that is only for them sending the referral.

I hope this information helps.

Respectfully

Tonie Greve RN CCC

Subject: no show for PCP assignment
Date: Tuesday, February 7, 2023 at 3:51:18 PM Mountain Standard Time
From: Greve, Tonie (IHS/PHX)
To: Turnage, Kevin D. (IHS/PHX)
CC: White, Jason (IHS/PHX/PIMC)

Good Afternoon Team Leaders;

I am seeing more and more patients who have scheduled pre-assigned PCP established appointments and are a No Show.
Is there a DNKA entry made by the medical assistants, and include those persons who are scheduling the appointments so they know to close out the PCP request?

I am out of the loop unsure, so asking this question. Today LaRosa, Miles had No Show appts. I sent the no show information to the schedulers to help expedite the process, I hope this helps with the process?

Respectfully,

Tonie Greve RN CCC

Good Evening All;
As directed I did get another Reasonable Accommodation for Fiscal Year 2023.
I did have the Reasonable Accommodations signed by a Licensed Clinician/Specialists relating to my disability and request for reasonable accommodations.
This information was faxed to Phoenix Indian Medical Center Human Resource Director for review and decision.

I have not heard the status of this request so following up with a email on status.
Can someone get back to me on this request?

Respectfully,
Tonie Greve RN Clinical Care Coordinator

CC: Lee, Candace S. (IHS/PHX)

Thank you for your correspondence.

I will stay if emotions get in way I will let you know and enter leave, and go home.
I am putting in the leave for the time off requested.
I am trying to get somethings caught up before I leave. I received the email from Kevin that I am now back with the (9) doctors/providers. A workload that I need to review and get what I can done.
9 doctors/provider is very stressful and for the whole fiscal year of 2022 I had to endure and directed to do, I am at a loss for words why today I am back or delegated/directed to cover 9 panels.
I am being exploited, and so stressed.

Thank you.

Tonie Greve RN CCC Silver & Ocotillo Teams.

Good Morning All Team Leaders;

I just received word that my brother passed away in Council bluff Iowa.
A nurse from Mercy Hospital just called me Ashley. 712-328-5272 land line is her contact number if you don't believe me or have questions. (this is the fear, harassment, hostile work environment so I am sharing)

I will need to request leave to get back to the mid-west and return to my Tribal Reservation for the funeral.

I am his POA, so I will have to call to get arrangements set up.
I have called my family back home in the mid-west to get some help with calling our reservation to obtain the body and take to Onawa Iowa Funeral Home and assist with getting arrangements set up.
I am asking for leave starting tomorrow January 24, 2022 and through February 6, 2023 I will be driving back as I do not want to fly, for reasons I don't want to share.

I will work the remaining of the day today January 23, 2023 to the best of my ability.

Sorry to have to send this email.

Tonie Greve RN CCC

To: Turnage, Kevin D. (IHS/PHX)
CC: White, Jason (IHS/PHX/PIMC), Lee, Candace S. (IHS/PHX)

Good Morning Kevin;

So your saying that I have to continue with the (9) doctors/providers until when?
This exploitation of me is very stressful, I have done the work of (2) full-time Registered Nurses Clinical Care Coordinators for the whole fiscal year of 2022 during your taking the position.
Prior I was doing this in 2021 under another supervision of management officials.

When will this exploitation of me/Tonie Greve stop?
This stress is very hard to handle day to day, it is causing mental stress, fear.

I keep hearing from management that it will change but you keep the harassment, exploitation of one federal employee and that is a hostile work environment that I have repeatedly ask to stop.
I am including all management officials up the chain so all are aware of this hostile work environment I have had to endure.

<u>I can not continue to perform the work of (2) full-time Clinical Care Coordination Registered Nurses and work as the MSA, and Medical Assistant and the duties of the Clinical Registered Nurses (2).</u>
<u>I will need to work over-time everyday and with this email requesting to work over-time to get the work done of 9 doctors/provider</u>**.**

I am asking for help and to stop the harassment, hostile work environment with the numerous job assignments.
Why am I the only Federal Employee at Primary care medicine clinic mandated to carry the work job assignments?

Respectfully,

Tonie Greve RN CCC

Good Morning Kevin;

Ok, I know that there will be changes down the pike later, but there will be changes for PCP based on the doctors specialty, based on patients request.
Will these doctors change when the new CCC is hired?

Please keep me updated with all the new process changes so that I can perform the duties.

Respectfully,
Tonie Greve RN CCC Silver & Ocotillo Teams

Subject: RE: CCC Provider list

It is divided in a way to make it equal by number patients not number of providers or specialty. Remember that you will not be following all of these providers patients only patients on your panel much different than what is currently done. I know Pogo is Temporary but she has taken on Dr. Skantharoopan Panel until a replacement is hired.

Good Morning Kevin;

It looks like I would have Hudson Internal- Med, Miles Internal- Med.
Pogo is temporary and Internal-Med.

Internal Medicine doctors put out the most referrals. Can we all have an Internal-Medicine Doctor on each team?

Just a suggestion.
Respectfully,
Tonie

Subject: Panel Changes
Date: Wednesday, January 4, 2023 at 9:07:56 AM Mountain Standard Time
From: Greve, Tonie (IHS/PHX)
To: Turnage, Kevin D. (IHS/PHX)

Good Morning Kevin;

I am checking on the status of the panel changes or if they are going to stay the same of me having the Silver & the Ocotillo Teams.
Reason: I am getting forward notifications after providers/doctors send to other team members requesting assistant from the other CCC who then forwards to me to complete the request.

Do you know when or if there will be changes to the assignments of panels, or doctors?

Respectfully,
Tonie Greve RN CCC Silver & Ocotillo Teams.

So sorry, I am rushing to get things done.

You click on View
Click on custom view, then you get where you can do drop down and click on the Unsigned Documents, below that you can put in author then put in the dates, you go down further and click on Title of the note you want to review. Then it should show all the un-signed notes.

Hope this helps

Perfect timing I have been trying all week to get a report to see how many notifications the MSA's have unanswered. How are you seeing how many see has, I know earlier this week she had over 500 open notifications and I spoke to her about it this morning.

If you know a way in RPMS, HER or iCare to get those numbers I would appreciate if you share with me how to do it.

I appreciate the reminder about the panels. I have mentioned it to the CMA's but I need to follow-up to see where they are at. I will send an e-mail to them asking when the last time was their panels were cleaned up and take that into consideration as well. Once I know this I can better determine the need for overtime and will let everyone know so the OT can be pre-approved by the Leave Approving Officials (LAO).

I copied Jason on this e-mail since he is now your current supervisor and LAO.

Good Afternoon Kevin;

I would like to put in writing;

The MSA Vanessa has over 200 outstanding unsigned notifications, and per your email I have been sending out Release of Information to get the clinic visit notes from outbound clinics as well as Radiology Reports, myself, this other workload has put a burden on me from contacting patients and closing out referrals.

Second: If your going by numbers then all the panels have to be cleaned to reflect the true numbers on the panels, I can only speak for myself, as I know Hassinger is clean, Miles is clean, still need to work on LaRosa, Skantharoopan/Pogodzinska, I do know Lori has cleaned Dr. Blacks panel through communication as team work she has contacted me to move some from that panel to one of the panels I manage, Jim's panel is

current up to February I believe, Baek, Goswami, Sahai needs work I have not completed her panel to reflect true numbers. This is just an example though to take into consideration.

Would like to get some over-time in year 2023 to clean the panels or what you decide is best.

Respectfully,

Good Afternoon,

Just want to touch basis and reiterate this has not been put in place yet. This was sent out for review so changes can be recommended and changes made to distribute patient load more equally by number of patients not by number of providers. This will change again as panels are created and new CCCs onboard.

Subject: Schedule for today Friday 12/30/2022

Good Morning Everyone,

Here are the changes to the schedule for today, Friday 12/30/2022

Unplanned leave:
Sharon

Scheduled Leave:
Melissa
Dr. Ngo
Sale
Tonie
Dr. Delgado-Thai (1300-1800)

CME:

Updates:
Ocotillo: Dr. Bellantoni to be covered by Nedra
Agave Team:
Coral Team: Dr. Delgado-Thai to be covered by V
Silver Team: Dr. Hassinger to be covered by Christine

Unassigned team
Colorado – Lynette/V
Briggs – Karyn/Nedra
Samuel-Ojo – Jennifer
McClellan – Michelle

Nurse Advice Line/Nurse Assessment Room
Arlene

Provider of the Day:
Samuel-Ojo

Leads:
North: Michelle
South: Jeritha

PCMC Lab: CLOSED

DCOE ON CALL:
Aaron Cleavenger 602-299-2545

Chief of Medicine: (covering)
Dr. Tsingine

As always if you have any issues please, see me.

Hon. Kevin D. Turnage RN, MSN Ed. AMB-BC, NHDP- BC, NPD-BC

Good Afternoon Kevin;

I would like to see if I could keep Dr. Hassinger on my CCC coverage, I so much enjoy working with Sharon who is a team player, and I like working with Dr. Hassinger. Just a suggestion.

Thank you

Tonie

Subject: New CCC Provider assignments

With changes coming to the CCC position and responsibilities we have divided the providers between the 3 current CCC's to make the division more equitable to all staff. The division will no longer be by team but by provider and will change as we get more of the CCC positions filled. Below is the new breakdown that will be sent out to the clinic by the end of the week. Please reach out to me if you have any questions.

CCC Coverage

Bertha Edison	**Tonie Greve**	**Elizabeth Hill**
Dr. Black	Dr. Baek	Dr. Phan
Dr. Hudson	Dr. Goswami	Dr. Pinsonneault
Dr. Ngo	Sallie Jim	Mark Richardson
Dr. Tsingine	Dr. Bellantoni	Dr. White
Dr. Hassinger	Dr. Miles	Dr. Delgado-Thai
Dr. LaRosa	Dr. Pogodzinska	Dr. Sahai

Good Morning Team Leaders;

I am checking if I am approved to use the 3 hours of administrative leave given to employees for Thanksgiving. I have not heard back so I can let Cynthia know and I will put leave into ITAS.
If I am approved will leave at 1pm.

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Teams

Subject: Cancel some leave

To: Turnage, Kevin D. (IHS/PHX)
CC: White, Jason (IHS/PHX/PIMC), Nash, Cynthia A. (IHS/PHX)

Good Morning Team Leaders & team member;

I am cancelling leave I had requested for dates December 29, 2022 and December 30, 2022.

I had a brother/family member in the hospital and was going to drive back to visit but he has been lifted off critical and has been moved out of the critical care unit and being discharged home.
I am sharing with all, I did mention this to Jason.

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Teams.

Hon. Kevin Turnage;

You are being dishonest with this email.
Just like you and Brenda Barr RN were talking today while she in your office, neither of you had on your face masks, I waited until she left then entered your office whereas you immediately placed on your face mask.

I am a professional federal employee only want to come into work to perform my official duties without being discriminated against for being immunocompromised with lung disease and being a American Indian/black federal employee.

I have repeatedly tried to resolve these issues with you at the lowest and you laugh at me, make fun of me being immunocompromised with lung disease. I use my handicap parking due to this disability.
This is not hidden as I cannot help that I have a disability that I was born with.

I was placed in a hazardous position last January 3, 4, 5 2022 whereas staff let in infected respiratory patients into the nurse triage/nurse assessment room whereas I became infected with coronavirus and had missed 56 hours of work and even completed the workers comp documentation whereas you were suppose to see why I was not given back my sick hours. Hundreds of federal employees at this facility (PIMC/PCMC) were given the sick hours back, except for me, you were suppose to follow up and you did nothing but ignore this

request as a subordinate under your direct supervision.

This all in email communication with you which can not be hidden or denied.

Respectfully,

Tonie Greve RN Silver & Ocotillo Teams

Subject: RE: Covid Swabbing Clinic

Except you never made a statement telling me "that the cold air exacerbates my lung disease where as you just laughed and told me that it should not cause that much problems as I walked from one building to the other but in fact I drove my car parked in the Handicap parking space that I use as an American with Disability for my lung disease." In addition, I never laughed. As stated numerous time what are you requesting in the form of a reasonable accommodation? What are you saying you cannot do? Are you saying you cannot have face-to-face contact with patients? I have had airflow increased in all clinic rooms that you would currently use the lab room and the triage room. I have ensured all fragrances where removed from the triage room and reiterated to all staff that cologne and perfumes are not allowed. Therefore, I am at a loss on actually what you are requesting, you can attempt to add this to an EEOC complaint however, you have failed to meet your requirements under the ADA law to participate in the interactive process.

Subject: RE: Covid Swabbing Clinic

Good Morning Kevin;

As I explained to you that on the computer I was using could not down load the system, so I used the old way RPMS.
I explained that I asked the Preceptor for the Medical Assistants Sharon for assistance for which I could not access. I then walked up front to let the Contact Reps know how to contact me that I was the person today that is going to do the swab testing in the Am and the PM.

I do have the reasonable accommodations and an email that you and I have communicated with, if you fail to honor the reasonable accommodations that is “Managements Rights” and it is discrimination and I have no further option but to add to the current EEOC that I have with the agency, which I have.

Today I added the laughter you did when I told you that the cold air exacerbates my lung disease where as you just laughed and told me that it should not cause that much problems as I walked from one building to the other but in fact I drove my car parked in the Handicap parking space that I use as an American with Disability for my lung disease.

I tried to resolve this reasonable accommodations with you at the lowest level, but you ignore it over and over again, even laugh at me.
I have the reasonable accommodation form DHS/HHS/I.HS in my permanent health records. If it is removed I will then file with the Office of Civil Rights as no one should be able to remove it from my permanent medical health records.

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Teams

Subject: RE: Covid Swabbing Clinic

Tonie,

You do have access to BPRM as all CCC’s have access. There are no appointments scheduled for today as it stands currently. You can return to your normal office and are done with this duty for today.

Everyone should have entry capability to the North Employee entrance, which is the door you are referring.

As stated in my last e-mail the agency has no reasonable accommodations on file for you. I asked what accommodations you are requesting on 15 July 2022 and you did not respond. I have also attached the e-mail regarding this same issue that was sent to you on 17 Oct 2022 and the request for additional information from you I sent on 23 Jun 2022, which a response was never received; this request had a deadline of 15 days from receipt of the letter. I have attempted diligently to work with you to determine your needs and what exactly you are requesting as a reasonable accommodation with no response other than the statement “I have a reasonable accommodation!” I personally have made more than a diligent and prompt good faith effort to assist with Reasonable Accommodations but you have not responded to any of my previous requests. Under the ADA, if an employee does not provide sufficient medical documentation as requested, the employer does not have a duty to continue the accommodation process. I believe you have failed to provide documentation without a valid reason as required.

V/r

Subject: Updated Policies

There have been numerous changes over the past few weeks including several policy updates. I have listed below are the policies that have changed in the last 45 days. I encourage you to review them and be aware of changes and note how they may affect your position or duties that you are charged with completing. I have included the direct links for your convenience.

Admission to Inpatient Services
Automated External Defibrillators (AEDs)
Continuing Medical Education
COVID-19 Employee Screening Process
COVID-19 Vaccination Requirement for Staff
COVID-19: Guidelines for Healthcare Personnel with Potential Exposure or Confirmed COVID-19
COVID-19: Use of Oral Antivirals for the Treatment of Infection
Heated Humidification
Hepatitis B In Pregnancy
High Alert and Look-Alike/Sound-Alike Medications
Inpatient Surge Policy

Medication Administration and Monitoring
New Employee Selection Guidelines
Overtime and Compensatory Time: Civil Service Employees
Pharmacy Immunization Services
Point of Care Testing CardinalHealth Premium hCG Combo Cassette
Prevention of Catheter-Associated Urinary Tract Infection (CAUTI)
Requesting and Terminating Access to Financial Systems (UFMS/FBIS)
Respiratory Season Visitation Policy
Risk Management Program
Self-Referred Sexually Transmitted Infection Testing – Standing Order
Staffing Guidelines
Training Record and Tool

As always, please reach out to me with any questions or concerns.

Good Morning Kevin;

Thank you for including all Management officials on this racial discrimination claim that I have brought forward.

George could you please send the EEOC forms to me to start the EEOC process.
Americans with Disability Act ADA-employers may not discriminate against qualified employees with disabilities terms of condition related to employment .
Title VII tolerates no racial discrimination subtle or other wise to assign job duties based on the racial preference.

Your email stated Registered Nurse and this contract Caucasian(white) employee is a registered nurse.

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Teams

Subject: RE: Respiratory Swab Rotation

Arlene is a RN however, she is not a CCC she is a contract RN. She has been contracted to do the triage room, it is not discrimination it is a management/business decision and ethnicity or race were not factors in the decision. Other considerations go into how we use a contractor, and some changes require modification of the contract through acquisitions. The other nurses Brenda Barr is included in the rotation as is Elizabeth Hill and Bertha Edison. So yes, all Federal Employee RN's in clinic are in the rotation. I am again including George Patton EEO since there is not a reasonable accommodation on file for you that our agency or I are aware of and have copies. The only thing that I am aware of was you stated you could not be in the triage room due to the fragrances in the room. That issue was addressed by ensuring all fragrances were removed and you were also told that when necessary for you to cover that position you could use an exam room in lieu of setting in that room. What duties are you saying you cannot not complete and are requesting a reasonable accommodation to have modified? Please provide the signed written Reasonable Accommodation forms that you are referring.

Good Morning Kevin;

This is discrimination by Management.

Arlene Caucasian (white) Nurse contract working at Indian Health Services.
She is not listed in the Rotation and is a Registered Nurse.

I have a reasonable accommodations and wondering why it is being disregarded.
Your first email stated that as Registered Nurses we can perform duties, but not this contract nurse.

She is the Nurse Triage/Assessment duties but not doing any triaging so why is this Registered Nurse being treated differently?

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Teams

Subject: RE: Respiratory Swab Rotation

Hi Tonie,

I can answer some of your questions.

- We are only swabbing patients with an existing order put in by one of the PCMC providers (not other providers) AND scheduled into the PCMC-COVID-TESTING clinic.
- You do not need to enter orders.
- Patients will park in a designated spot outside and call the contact reps. The contact reps will then contact you to let you know the patient has arrived. You have the option to swab them outside or ask them to come into clinic and the swabbing can be done in the phlebotomy room.
- Hours will be: 830-930, 2-3 (only 2 hours per day)
- After swabbing is complete, they are taken to lab (likely all can be brought over at the end of each hour, but it will be confirmed with lab how long these samples can remain out)
- No, you will not be running the tests on the samples.

I will send the covid testing email to the whole clinic tomorrow. Thank you!!

Aimee Baek, MD
Chief of Primary Care
Phoenix Indian Medical Center

Subject: RCIS Concerns
Date: Wednesday, December 14, 2022 at 1:53:28 PM Mountain Standard Time
From: Greve, Tonie (IHS/PHX)
To: Turnage, Kevin D. (IHS/PHX)

Good Afternoon Kevin:

I have been going through all 9 panels of doctors/provider for the RCIS referrals.
I am noting that the Ocotillo MSA has not signed off on the notifications for the initial referrals and has not acknowledged any completed RCIS/Referral Appointments that have been completed.
I am trying to get the referrals closed.

Last week I did print off a lot of the reports for completed referral appointments and faxed ROI's to the vendors as well as outbound calls to the vendors to have them send the clinic visit notes and or radiology reports.

I have also been tasked by Dr. Baek to send out the PCP change letters for Dr. Skantharoopan's panel which I have approximately completed over 230 letters printed and mailed to the patients. This extra duty is being done to the best of the time allotted in the work day.

I am asking if you can look into this concern for patient care, as well as continuity of care.

Subject: POA FOR PATIENTS
Date: Friday, December 9, 2022 at 10:28:41 AM Mountain Standard Time
From: Greve, Tonie (IHS/PHX)
To: Turnage, Kevin D. (IHS/PHX)

Good Morning Kevin;

I maybe too concerned, but when a patient has a cognitive disability and unable to make self-decisions, can we ask whomever is screening the patients to get a copy of the court order listing the POA so it can be uploaded into the patient's health records?

When contacting the patient I would not know of the disability until I call.
For newly assigned future appointments to establish care I do review the IPL to see the listed diagnosis, and found missing documentation.
I usually review the patient detail to see if a POA is listed or review progress notes to see if legal document is uploaded in progress notes.

Respectfully, thank you for any assistance

Subject: Panel Management pre-vist appt
Date: Wednesday, December 7, 2022 at 11:30:05 AM Mountain Standard Time
From: Greve, Tonie (IHS/PHX)
To: Turnage, Kevin D. (IHS/PHX)

Good Morning Kevin;

Can I ask that when the schedulers for the panel management pre-scheduled the visit to include me in the notification, not just in the panel management note.

I am stumbling on charts where patients have been scheduled for the appointments and there is a note listing my full name and credential but I am not included in the notification.

Reason: I make a reminder of the upcoming appointments and then if patient kept the appointment, I update ICARE and send out the welcome letter to the patient.
This makes the panel numbers complete in real time.

Randy Saria is not including me in the notification, unless this process has changed?

Thank you for your assistance in this process.

Subject: RE: Respiratory Contingency Staffing Plans for PCMC

Good Morning Kevin;
Contingency Status as Registered Nurses.
Will you be able to provide all the current policies for Primary Care Medicine Clinic for review if any questions should arise.

Example: Do we have standing orders to perform glucose monitoring or will we have to enter the order, wait for the provider to sign off then complete?

As Registered Nurses we do not work off the license of the medical doctors or providers, and it will help expedite the clinic flow.

When doing nurses appointments say for blood pressure readings will there be parameters set in place so that the Registered Nurse can complete the reading and document so that if patient is within the parameter that patient can leave without the nurses trying to reach the ordering providers?

Next question: When an Registered Nurse is moved to another area will that nurses work load be covered by other Registered Nurses?

I know the contingency status has not happened yet, but these questions have come up in the past and I'm sure it will when covering as the primary care nurse during the status plan.

Thank you for any assistance with the questions.

Good Morning,

As we are all aware, there is an ongoing surge with respiratory illness with COVID, Influenza and RSV. Administration is working on a contingency plan for the entire campus; I am providing you all notice that in contingency status as Registered Nurses you have clinical care in your position descriptions. If needed all Federal Employee RN's in PCMC will be assigned to cover providers and room patients in clinic to prevent the CMA's from being overloaded and to maintain patient satisfaction. Please be mindful that any given day you may be assigned to work in the clinic, therefore please report ready to fill these slots if necessary. Additionally, you may still be required to triage patients depending on staffing illnesses. If you have any questions or concerns please reach out to me to discuss. If there are any skills you need refreshers on also please let leadership know.

Good Morning Kevin;

I just wanted to take time to address one of Primary Care Medicine's extraordinary team member.

Sharon goes above and beyond, communicates questions, concerns, out reaches to patients, and reviews the panel of Dr. Hassinger includes me in the communication so that this panel is current with the actual numbers assigned on the panel, and documentations to changes to the panels for any future references.

She is a team player always including the RN for inquiry, questions and outreach to patients if the patient needs more education on disease process, accessing clinics campus wide, and if patient is unable to communicate appropriately with the CMA.

I want to thank you for her being on the Silver Team, it is a great pleasure working with a strong team member.

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Teams.

To: Turnage, Kevin D. (IHS/PHX)

Good Morning Kevin;

I just wanted to let you know the good work of Brenda Jensen is with her team and with team work at primary care medicine clinic.
She has been instrumental in helping contact patients for appts and also assisting with ROI sending and getting the outside/outbound health records sent to PCMC for PCP to review.
This helps with the patient care.
I also noted the outreach to patients for clinic appts and to complete orders prior to coming appt date, and communication with Jim included.

I just wanted to let you know how this helps patient care and her diligence in care and pre-visit planning that helps support the mission of PCMC.

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Teams.

To: Turnage, Kevin D. (IHS/PHX), Dickerson, Angela M. (IHS/PHX)
CC: Baek, Aimee (IHS/PHX)

Good Morning Team Leaders:

Is there a new process for paneling of patients?

1. The panel coordinator simultaneously places the doctor in the box, and schedules future 60 minute appointment is what I am seeing. (**New Process**)

Questions:
If the patient does not keep the 60 minute appointment, does the patient stays on that panel?
Do we leave all patients on the panels 3 years, only removing if not seen at PCMC or PIMC greater than 3 years?

Reason; Patient was scheduled an appointment did not keep the appointment, but is listed under the doctor. Now doctor wants the patient removed from panel since patient has not been seen by them in over 3 years, but patient has been seen by other primary care medicine providers. What do you want me to do?

Thank you for any assistance.

Tonie Greve RN CCC Silver & Ocotillo Teams.

Subject: Provider Change

Good Afternoon,

I am making a change to a CMA/Provider assignment. Beginning on Monday 11/7/2022 Christine will be assigned to Dr. Skantharoopan and Brenda Jensen will be assigned to Sallie Jim. They will be changing their days off to match their new assigned providers. If you have any questions or concerns please let me know.

Good afternoon Kevin;

I have a question on a person who cannot make informed consent due to diagnosis.

No POA present or documentation uploaded for patient POA.
Person resides in group home, care giver who brought person in says they are missing the documents.
Does the person get paneled or do we wait until the documentation is brought in and updated?

Please Advise

Thank you

CC: White, Jason (IHS/PHX/PIMC)

Good Morning Kevin:

I do send for the release of information as well as call outbound to the vendors to get the health records.
I reported this concern for patient continuity of care and delay in care.
I do understand Management has the decision on work assignments.
I just wanted to report and not have fear in reporting.
I do have 9 doctors and its hard to do the major duties of the MSA and MA and CCC.

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Teams

Subject: RE: concern

Tonie,

I appreciate your concern however, management makes decisions on work assignments and there was a need to move the individual to the south side of the clinic. The Silver MSA duties are split at the current moment between the two MSA's on the North side, as a CCC you can also request records not just delegate these responsibilities. Doing so would also help alleviate any delays in patient care especially since you appear to be opening these charts in accessing if they have been handled or not.

Subject: concern

Good Afternoon Team Leaders;

I expressed concerns when a MSA was moved from the Silver Team.
I have gone through numerous referrals and the MSA assigned to the Ocotillo and part of the Silver team has not signed off on notifications from PRC on initial referral.
The Msa has not signed off on the appointments that have been completed or sent ROI to get health records from the vendors.
This is delaying in closing referrals and delay in care for some patient's who need f/u appointments.

Miles has 507 referrals. Silver Team
Skantharoopan 370-Silver Team
Ocotillo Teams:
Baek-142
Goswami-212
Jim-143
Sahai-239
Bellatoni-29

Please assist in my concerns.

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Teams

Subject: Documentation in Medical Charts

As previously discussed with you in May of this year, medical records often reflect differing diagnoses and treatment recommendations among multiple caregivers. However, criticism of previous health care contributes nothing to the patient's needs. Patients may take these casual remarks critical of prior care quite seriously, possibly destroying their relationships with previous caregivers and/or you. Since all pertinent facts about prior care are rarely available, use caution in making judgments and comments in the chart if you disagree with a past or current caregiver. Likewise, basing your opinion of prior care solely on the patient's report of prior circumstances may not reflect changes in symptoms and findings over time. In addition, the patient's perceptions and recollections may be inaccurately reported. Never should you document in the patients chart comments that are pointing fingers or blaming others in case the prior care. Remarks or record entries critical of prior care may prompt patients to consider litigation, even when no negligence occurred. You shall not document derogatory or discriminatory remarks in the chart. Patients have the right to access their medical records and may be sensitive to notes they view as disrespectful or prejudicial to others. Arguments, disagreements and conflicts with other physicians, nursing staff, employees or administration must NEVER be addressed in a medical record; these issues shall go through the appropriate chain of command and not through the patient's medical record. Subjective statements regarding prior treatment nor poor outcomes should be presented as facts. Do not write any finger-pointing or self-serving statements in the patient's medical record. Non-patient care information such as questioning processes must not be in the patient's chart nor should the filing of incident reports or referrals to legal services be in the chart. I expect this type of inappropriate charting to cease, as they are not appropriate to put in a patients chart.

Subject: RE: Documentation in Medical Charts

Because I am not the supervisor of the other employees and you are the individual that wrote the notes/addendums in EHR that I am aware of., If you are receiving notes with improper documentation or things that should not be in a patients chart then please notify me. All I am doing is asking you not to do it.

V/r

Hon. Kevin Turnage MSN Ed. RN, AMB-BC, NHDP-BC, NPD-BC

"I am not authorized to obligate the government for any work, service or product. Subject: RE: Documentation in Medical Charts

Good Morning Kevin;

It seems that many Federal Employees and Supervisors are doing this practice/charting at primary care medicine clinic.

I get numerous documentation listing my name fully in the medical records with my credentials listed asking if I called patient or to contact patient and to do processes.
Is this what you are referring to?
I do not document derogatory or discriminatory remarks in the patients permanent chart. I do not discriminate against any person or patient.
I am confused why I am the only primary care medicine federal employee getting this email knowing what you have listed happens or is documented and sent to me daily.

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Team.

Subject: Documentation in Medical Charts

As previously discussed with you in May of this year, medical records often reflect differing diagnoses and treatment recommendations among multiple caregivers. However, criticism of previous health care contributes nothing to the patient's needs. Patients may take these casual remarks critical of prior care quite seriously, possibly destroying their relationships with previous caregivers and/or you. Since all pertinent facts about prior care are rarely available, use caution in making judgments and comments in the chart if you disagree with a past or current caregiver. Likewise, basing your opinion of prior care solely on the patient's report of prior circumstances may not reflect changes in symptoms and findings over time. In addition, the patient's perceptions and recollections may be inaccurately reported. Never should you document in the

patients chart comments that are pointing fingers or blaming others in case the prior care. Remarks or record entries critical of prior care may prompt patients to consider litigation, even when no negligence occurred. You shall not document derogatory or discriminatory remarks in the chart. Patients have the right to access their medical records and may be sensitive to notes they view as disrespectful or prejudicial to others. Arguments, disagreements and conflicts with other physicians, nursing staff, employees or administration must NEVER be addressed in a medical record; these issues shall go through the appropriate chain of command and not through the patient's medical record. Subjective statements regarding prior treatment nor poor outcomes should be presented as facts. Do not write any finger-pointing or self-serving statements in the patient's medical record. Non-patient care information such as questioning processes must not be in the patient's chart nor should the filing of incident reports or referrals to legal services be in the chart. I expect this type of inappropriate charting to cease, as they are not appropriate to put in a patients chart.

Subject: CCC Roles

Good Morning,

Since taking the supervisory clinical nurse position in the primary care clinic, I have been evaluating processes and roles. I have also been working on the role clarity and responsibilities for different positions. I plan to introduce different evidence based processes into our practice at the primary care clinic. While changes will not be immediate I to want to be transparent and communicate the plans that I currently have and am aware of that will be put into place as these evidence based principles are implemented. This includes converting all

clinical nurse positions to clinical care coordinators (CCC) and relocating all CCC's to be co-located with their assigned to team as the open positions fill. The health technicians will begin evaluating patients based off an evidence based rubric to determine if a patient needs care coordination. Additionally, CCC's will begin developing panels based off input from the providers and CMA's who have done the rubric. This will involve the CCC's doing face-to-face clinic visits with the patients and ensuring that patients are involved with their care and are at the center of the coordination. This will include the care coordinators not only helping patients navigate the system but also ensuring that the patient is receiving the appropriate Healthcare Services and being educated on self-management and disease processes. This will allow the CCC's to develop care plans for the patients that are in need of care coordination. The health technicians and the CCC's will have daily huddles with me (these have begun with the health technicians at 0715 each morning) the CCC's huddles are planned to be daily at 0900 to discuss patients and care plans for scheduled patients when implemented. This model will allow PCMC to ensure we are providing proactive support as a multidisciplinary team to ensure more patients are receiving proactive support and coordination of care provided to the patient's by different specialties and specialists. I am unable at this time to provide a timeline for the beginning of the implementation of the CCC panels, relocation or changes to clinics. However, each CCC will work with a caseload of patients acting as a central point contact to ensure patients are receiving the personalized care and support, ensuring the patient is receiving the support, and care of that they need. The process for determining panels and panel sizes have not been determined as of yet but as this information is determined it will be shared with the CCC's for their input prior to implementation. As always, I appreciate all of your hard work and dedication to our patients in their families. If you have any questions, comments or concerns please contact me.

Subject: No included in Process change
Date: Monday, October 24, 2022 at 4:01:50 PM Mountain Standard Time
From: Greve, Tonie (IHS/PHX)
To: Turnage, Kevin D. (IHS/PHX)

Good Afternoon Kevin;

I have found several patients pre-assigned to a PCP but not included in the panel management note.

a. Was patient contacted for the appointment.
b. Was outside records sent for the pre-assigned appointment?

These are not questions I can answer and if not called about appointment the patient may No Show.
If I am not included in the panel process it impacts my official duties and to keep panels updated with the patients assigned.

Referrals are happening the same not being contacted by the PRC department who are picking up the referrals this is not PCMC PRC team member.
This impacts patient care and continuity of care and impacts my official duties for closing out referrals and or entering new referrals for f/u visits.

Any assistance will be greatly appreciated.

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Teams

To: Turnage, Kevin D. (IHS/PHX)

I am away from the office from October 7, 2022 thru October 16, 2022. Returning 10/17/22

Subject: RE: reasonable accommodation denied?
Date: Thursday, October 6, 2022 at 4:00:38 PM Mountain Standard Time
From: Greve, Tonie (IHS/PHX)
To: Turnage, Kevin D. (IHS/PHX)
CC: White, Jason (IHS/PHX/PIMC), Lee, Candace S. (IHS/PHX)

Good Afternoon Kevin:

I have a signed Reasonable Accommodation letter by a Licensed Clinician, specialists who completed the I.HS/HHS form and turned in to the agency.
I did not refused the mandatory assignment on 10/6/2022 out of fear and retaliation/reprisals.

I was discriminated and it will be addressed through the EEOC process.
As a Federal Employee no one should be discriminated.
All employees who have reasonable accommodations should be treated the same with no preferential treatment.

You were acting in the Primary Care Medicine Clinic Nurse supervisor prior to taking the position permanently and at that time told you of my disability.
There is nothing more that should be supplied for the Reasonable Accommodations form, my immunocompromised status will be for the rest of my life and has been before working at HHS/I.HS.
I left that position Nurse Assessment/Nurse Triage at primary care clinic due to my permanent disability and other discriminatory issues. (I am sharing this information again with management officials)

I am working with you as my supervisor but I do not want to be discriminated, harassed or retaliated.

Thank you for looking into the E-Comp that I completed back in January 2022 of this year which I submitted the required documents.
I was mandated to work in the nurse assessment/nurse triage January 3, 4, 5 and became infected with coronavirus on January 6, 2022 after being exposed to several persons let into the room. I used 57 hours of

leave and like I discussed as I know the only person in primary care medicine clinic who has not had the leave restored. I submitted positive covid-19 test, documentation of clinic visits, f/u visit while out sick with the virus. I hope this can be completed it needs a supervisor to go into the system and answer their portion as I was told by Leonard.

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Teams

Subject: RE: reasonable accommodation denied?

Tonie,

As far as I am aware, your RA was not denied I am not aware of a clinician reviewing your RA or any documents other than what EEO officer sent to me. If you have additional information or documentation please share. We discussed when I became clinic Supervisor that you were requesting a RA for the triage room due to your Asthma and I agreed that if you had to do triage then you could use an exam room instead of the triage room. I have not received any other requests other than that one for the triage room. If there are other accommodations, you feel you need please let me know so that they can be properly addressed. As explained this morning regarding your ecomp claim I would try and follow-up and asked that you give me until next week to see if I could get a response because since it was filed it is no longer with IHS it should be with the Department of Labor. I do not have the specifics of when you contracted COVID including dates or specific laws that may or may not have been in effect at that time. I have left voicemail for my contact and will continue to follow-up to try and get you an answer regarding your ecomp claim.

Subject: RE: reasonable accommodation denied?

It has been denied per the written statement by the Licensed Clinician.

I was placed in this nurse triage in January 3, 4, 5 and was exposed to positive covid-19 patients and became infected.
I filed the E-Comp and used 57 hours of sick leave. All other Federal Employees were given back the hours

used for the sick leave except for Tonie Greve. I have asked Angie Dickerson to complete as the supervisor, and asked you to assist in completing.
I still have not had the E-Comp hours returned to my bank. I do not understand why I am the only primary care medicine employee who has not had this completed by a supervisor.

I am not the only persons at primary care medicine clinic that have requested Reasonable Accommodations but the forms I submitted have been denied. I am following your directive but had to ask and clarify.

I don't have anyone covering my official duties so I will have no choice but to stay here and perform double duties.

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Teams

No as we discussed you can use and exam room instead of the triage room. Would you rather go to vaccine clinic and do vaccinations on employees today and tomorrow.

Subject: Panel Management
Date: Wednesday, September 28, 2022 at 9:45:36 AM Mountain Standard Time
From: Greve, Tonie (IHS/PHX)
To: Turnage, Kevin D. (IHS/PHX)
CC: White, Jason (IHS/PHX/PIMC), Saria, Randy (IHS/PHX), Nash, Cynthia A. (IHS/PHX)

Good Morning Team Members:

Can I ask that when assigning patient's appointments to establish PCP with a doctor that the information be entered in a panel note.
It was discussed at the last Panel Management Meeting held at the dental annex this would be the process.

Reason: if you put this information in a consult and click it but have to go to another chart you lose the information.

Pro- if put in a panel management note the information is not lost and all team members will know the status of upcoming appointment or if patient did not keep the pre-assigned appointment.

Pro- it will help coordinate the panels without missing patients paneled and when changing PCP.

Many times I get request for PCP change and per policy there is no panel management note listed when the patient was originally paneled.

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Teams

Subject: RE: Vaccination Blitz
Date: Friday, September 23, 2022 at 9:56:06 AM Mountain Standard Time

Good Morning;

Can you send the new organizational chart so I have for my records it will be greatly appreciated.
Will this change your call in Leave and Attendance or will it stay the same?

The tour of duty change is a labor question according to the CBA.
Mandatory is new for pcmc is why I asked.
I will come in on 10/4/22 at 0630 and work until 0730 for the 1 hour over-time until 3pm at the vaccine clinic, then work until 4pm my regular duty if I am understanding this.

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Teams

Subject: RE: Vaccination Blitz

Good Morning,

Mandatory but subject to change depending on needs. I understand you have never been asked to cover in the past however, in the past Employee Health was not under Primary care however, as of March 14, 2022 Employee Health is now under Primary Care. The approved change states:

1. Restore alignment of the Infection Prevention Supervisor and Infection Prevention Nurse positions to the quality division.
2. Realign the Employee Health team under the Primary Care Medicine Clinic (PCMC) to promote engagement with the primary care teams, develop a streamlined process for employees to obtain employee health records, and model employee health practice after the population management model utilized by the PCMC care teams. Supervision of the employee health team will follow that of the PCMC care teams:
    a. The Employee Health Nurse will report to the PCMC Supervisory Clinical Nurse through the CNO division. Coverage for the Employee Health Nurse would be provided by the nurses and medical assistants in the clinic.
    b. The term employee health Nurse Practitioner will report to the PCMC Department Chief through the CMO division. This person will be able to assist with other PCMC functions and support both employees and patients when not engaged in Employee Health tasks.

Therefore, support of the vaccine blitz falls under PCMC and is a PCMC duty. I will put you down for 10/4/2022.

Please let me know if you have any further questions.

Thank You,

Hon. Kevin Turnage MSN Ed. RN, AMB-BC, NHDP-BC, NPD-BC

Good Morning Team Members;

Reviewing notifications from patients who have completed clinic visits and do not know how to contact our PRC department or where our team member is located.
Can we assist patient after the clinic visit to the office where Paulette is located for customer service and at this time if patient needs to apply for resources patient can visit with PRC and then with Benefits coordinator.

If you need any assistance from me please call me at my extension 6532.

Thank You Team Members for all you do it is greatly appreciated.

Subject: Changing PCP
Date: Tuesday, September 20, 2022 at 11:20:55 AM Mountain Standard Time
From: Greve, Tonie (IHS/PHX)
To: Turnage, Kevin D. (IHS/PHX)

Good Morning Kevin;

I just reviewed a note written by chief medical officer who listed that “generally allow one provider change per year”
Does this mean All patients can only change PCP once a year?
Is this policy now?
Will patient’s be informed of this also when they are being assigned?

Reason: I have changed patient’s PCP this year along more than twice some three times this year from doctor to doctor.
I am getting notifications from Medical Assistants and contact representatives to change PCP’s
Please advise

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Teams

Subject: RE: Panel Management
Date: Tuesday, September 20, 2022 at 8:27:12 AM Mountain Standard Time
From: Greve, Tonie (IHS/PHX)
To: Turnage, Kevin D. (IHS/PHX), Saria, Randy (IHS/PHX)
CC: White, Jason (IHS/PHX/PIMC)

Good Morning Kevin;

I sent this to you to review as my direct supervisor.
It was my understanding Commission Corp Officer is detailed here at primary care for healthcare computer issues and contracts, but now is doing the paneling of patients.

I was bringing up attention to the error in the electronic health record that should list each doctor/provider separate, when anyone of the team members paneling click on the box it combines Miles and LaRosa as you can see where I inserted the problem.
Randy had sent several pre-assignments notifications of paneling patients to my team is why I sent the email yesterday.

I do not know what the process changes are who really is doing what I am not included in the changes until I ask questions, I did include Randy as you included him in the reply.

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Teams

Cc: White, Jason (IHS/PHX/PIMC) <Jason.White@ihs.gov>
Subject: RE: Panel Management

Did you reach out to Randy to discuss at the lowest level?
It is my understanding that the doc in the box does not get changed until the patient keeps the appointment, he documents who he has scheduled the patient with in Panel Management. I am not 100% sure I understand the issue so I may not even be replying with the correct information to your question. I have included Randy on this e-mail. I recommend reaching out to him and discussing with him. If you two cannot remedy the situation let me know and we can discuss.

Hello everyone,

I'm pleased to introduce our newest provider to PCMC! Dr. Maria Bellantoni started this week and will be on the Ocotillo team. Please welcome her when you see her around clinic!

Maria Bellantoni is excited to join the PCMC team having moved to Phoenix from her hometown of Baltimore, Maryland! She is a graduate of the Uniformed Services University School of Medicine where she commissioned as an officer in the U.S. Public Health Service Commissioned Corps. She completed a residency in Internal Medicine and Urban Health at the Johns Hopkins Hospital, and a fellowship in Geriatric Medicine at Johns Hopkins Bayview. She has particular interest in the care of older adults and quality improvement science. Outside the clinic, she enjoys exploring the outdoors and ballroom dancing with her husband, John.

Subject: RQI Deficiency

Wednesday, September 7, 2022

Good Morning Tonie,

As I am sure, you are aware, the Phoenix Indian Medical Center (PIMC) transitioned to the Resuscitation Quality Initiative (RQI) program in order to optimize patient safety for those requiring resuscitation within the Phoenix Indian Medical Center health care system.

The policy is specific in that it states, "All staff will be enrolled in and will maintain compliance with RQI e-certifications, even if an AHA course is taken from another facility or location."

You were noted as OVERDUE-NOT STARTED in RQI 2025 Healthcare Provider Entry Assignment on the last deficiency report that was provided to administration and quality. Continued failure to maintain certification may affect your PMAP scores at year-end.

Please ensure to be working on your RQI modules and completing your skills as required. If you need assistance, please feel free to reach out to me.

Date: Monday, August 8, 2022 at 11:07:35 AM Mountain Standard Time
From: Greve, Tonie (IHS/PHX)
To: Turnage, Kevin D. (IHS/PHX)

Good Morning Kevin;

I have a question to who covers the Specialty Clinic Referrals?

I am getting tagged in notifications for Badeer, Escarska and Yang, Soo Han.

I know that Chacon is the CCC in the specialty clinic she has come over to see how I do my spread sheet.

I am wondering why I am getting tagged in notifications.
Do I just sign off and ignore it hoping that the CCC in those clinics will pick up on the referrals?
Do I remove my name as I am not working in that clinic?

Can you look into this for me?

Thank you.

Subject: RE: Meeting at 12:30
Date: Tuesday, July 19, 2022 at 12:15:24 PM Mountain Standard Time
From: Greve, Tonie (IHS/PHX)
To: Turnage, Kevin D. (IHS/PHX)

Good Afternoon Kevin;

I have not had time to log onto the outbound hospitals, will try to get that done as others in the meeting have not completed.
I don't need to meet about this, but I will contact when time allows, right now I am trying to get caught up from the meeting, and won't get to it today.

Is there a deadline to get the outbound hospital access set up? This was not discussed in the meeting.

Do we need to meet on the written comment "I am going to contact when time allows" you asked us to submit concerns and questions which I did. So I am confused again why a meeting is needed?

Do I need to have Union representative present during this meeting? If I do please arrange.

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Teams

Date: Wednesday, July 13, 2022 at 10:57:55 AM Mountain Standard Time
From: Greve, Tonie (IHS/PHX)
To: Turnage, Kevin D. (IHS/PHX)

Kevin;

ER/Hospital ICARE f/u took 25 minutes today.
outreached to outbound hospitals to speak with patients. Total 7 patients were seen in ER/Hospitalized made contact and updated the PCP & MA.
In Documentation I include Dx-disposition-name of any outbound facility/hospitals, and assist with making f/u appointments, include GPRA reminders, last clinic appt with PCP, and or removing any deceased from panel and updating all team members after getting outbound documentation.

This is the usual time it takes unless I am gone on leave.

Respectfully,
Tonie

Subject: RE: Daily Duties

I will try to keep time on the activity today, but with my ADHD I bounce around by the incoming telephone calls then return to the duty but by the end of the day I try my hardest keep my notifications down to minimum so I am able to start the process over again.

I am having to do a lot of Joy's telephone calls to patients to review labs, make appointments, and do inquiry of if patient was seen at outside clinics. Solution: Pre-Visit Planning.
If the Ocotillo MSA would send the ROI after the referral appointments and document, send to be uploaded into vista image, so I can close out the referral and enter new one if the outbound specialist is requesting f/u visits. Ocotillo is really behind so I have to do the research myself, and tag, if you go into notes you can note the notifications have not been signed off.

Also it would alleviate patient complaints if MA would return calls to patients when I send out the welcome letter I include the MA-MSA-Myself so when I am getting calls and try to call the MA and it says voice message is full, then I have to believe the patient and I do assist the patients, but this is time consuming but I try hard to get duties done throughout the day. I do understand others are on lunch, so that is why I take late lunch 1230-1245 so that everyone is back and the call agents are not needing assistance or lab, or campus wide provider.

I did speak with you on the Domino effect.
Solution: Stagger lunch so team members are available to answer calls would offset.
MA return calls or clear voice messages to patients.
MSA send ROI to vendors/clinics/hospitals

Date: Tuesday, July 12, 2022 at 3:06:12 PM Mountain Standard Time
From: Greve, Tonie (IHS/PHX)
To: Turnage, Kevin D. (IHS/PHX)

Thank you for responding.

I know leadership has changed, but this work load of 8, and I am still getting referrals for Briggs and Pogodzinska as the two MSA are attached to these providers, so they tag me in the notifications.

Bertha told me that you and Dr. Baek gave her the pediatric transitioning paneling as her official duty.

Kevin when I had the official job duty of Clinical RN I screened/triaged 14-21 patients daily and did the paneling of All patients as well as the call agent notes.
September prior to Covid 2019 I brought down the waiting list to just 584 and presented to the UPC council.

I am just asking to have a more fair equitable division of the work load.

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Team

Good Afternoon Team Leaders;

I have a question that would like addressed.

(3) Clinical Care Coordinators are at Primary Care Medicine Clinic

I see that Bertha RN CCC only has (4) providers on the Agave Team.
Bertha is paneling patients to the Ocotillo Team, why isn't she assigning the patients to her team, she only has four providers on the Agave team.

I thought Brenda Clinical Rn duties were paneling patients?

I am the only Registered Nurse, Clinical Care Coordinator Phoenix Indian Medical Center wide that is assigned (8) providers and then two on the Un-assigned team I am getting workload.

I am asking why the work load is not distributed equally, this disparate work load to me is not fair or equitable for only (1) Rn clinical Care Coordinator to manage.

Respectfully,

Tonie Greve Rn CCC Silver & Ocotillo Teams.

Bertha is paneling patients to the Ocotillo Team, why isn't she assigning the patients to her team, she only has four providers on the Agave team.

I thought Brenda Clinical Rn duties were paneling patients?

I am the only Registered Nurse, Clinical Care Coordinator Phoenix Indian Medical Center wide that is assigned (8) providers and then two on the Un-assigned team I am getting workload.

I am asking why the work load is not distributed equally, this disparate work load to me is not fair or equitable for only (1) Rn clinical Care Coordinator to manage.

Respectfully,

Tonie Greve Rn CCC Silver & Ocotillo Teams.

Subject: RE: Updating PPM After Empanelment

CC: Turnage, Kevin D. (IHS/PHX)

Good Afternoon;

It was my understanding that Brenda and Randy were updating the PPM after the patients have kept the pre-assigned appointments by clicking paneled on the drop down tab that included the dates.
Has this process changed?

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Teams

Subject: Updating PPM After Empanelment

Hi everyone,

I was pulling the data for the monthly QAPI report on empanelment for PCMC and found that the numbers were strikingly low (just 2) for the month of the June. Brenda has been combing through the schedules to find the patients who were scheduled for establish care visits and found that PPM was updated with the empaneled provider, but the empanelment date was not entered. Please make sure to enter the empaneled date – this is the only way that it appears on the empaneled view of PPM where I grab the data from.

Let me know if you have questions.

Thank you!

Aimee Baek, MD
Chief of Primary Care
Phoenix Indian Medical Center

Tonie,

Thank you for your response I am sending the documents necessary to complete a reasonable accommodation. According to our EEO department, there are no reasonable accommodations that have been agreed to by the agency. As such and as your new supervisor, I am attempting to gather information regarding your disabilities, and functional limitations so they can be incorporated to reasonable accommodation request. Please print sign and return the Letter from me. I will also include the documentation packet for your health care provider to complete along with your position description so the provider can explain how your disabilities interfere with your ability to meet the functional requirements of your position. The forms need returned to George Patton with-in 15 days from today. Again, all attachments will be sent via secure e-mail. Upon your return from leave, please reach out to schedule a time to discuss.

From: Greve, Tonie (IHS/PHX)
To: Turnage, Kevin D. (IHS/PHX)
CC: Lee, Candace S. (IHS/PHX)

Kevin;

I do have reasonable accommodations for my Lung Disease.
Since onboarding and when asked I have forms submitted from the Agency by listing my disabilities. Working here for 11 years, you may have received the information in a email. I do respond and list my disabilities.

2. This information was given to Rebecca and I have asked repeatedly to not have 3 or more broadcast sent at the same time.
As the Direct supervisor you should have been given the copy of the reasonable accommodations for my lung disease and the coverage for the Nurse Assessment/Triage Room. I did speak to you about the E-Comp which I still have not heard back on status from you which as immunocompromised I was placed in the nurse assessment room repeatedly, not a shared duty with all team CCC, contracted Covid.
Broadcast messages sent in sets of 3 or more is a disruption, especially if I am typing a telephone conversation with a patient that I have on the phone and it stops it immediately, there is evidenced base literature and data that can support this as a interruption.

3. I do complete the task but <u>where does it say any email today or in the past that I am the only person to schedule for the Whole Primary Care Medicine Clinic?</u>
Rebecca included all in the email, she initiated it for all team leader to be aware.

4. I have seen where patient information has been broadcasted to all Phoenix Indian Medical Center, and I have had training from this service unit not to do broadcast due to the reasons that if a person logs off it will go out to everyone who is logged on. That is a Hippa violation and a not a Need to Know.
The skype messages, have been addressed when I get it that has patient identification in it, I do inform those who send it not to use it to please put the information in a notification and I will review the information, so to protect the patients identity, this as well if I receive outside emails from patients.
(EBM) has that been approved by Indian Health Service and brought to the attention to HIM Director?

6. I do work effectively and go above an beyond to assist the patients that Indian Health Service Serves. I am held accountable not only for my Official Duties but that of the other team members who shop while at work, watch movies on their phones, turn off their phones, not answer their phones, you have repeatedly sent out emails to staff prohibiting these types of practices, but it still continues.
I do carry out the task of scheduling the appointments not only for the Phoenix Indian Medical Center Case Managers but for patients who repeatedly can not reach anyone else, I have numerous Doctors from within Phoenix Indian Medical Center who contact me as well as other departments as they can not reach the persons who holds official positions but do not respond to the calls or broadcast or skype messages.
Page 2 Paragraph 2 does list my duties but once again it does not say that I am to cover the Whole Primary Care Medicine Clinic, and I did write that all have the same job description listed on the Official Position Description, that is true. I carry out my official duties daily unless on sick leave or vacation, then return to complete the duties that were not picked up by others even when patients repeatedly try to reach the employees who are on their phones. This was in your previous emails.

You Hold me accountable to do my official duties, and (other duties as assigned), your disparate treatment is

very evident from this email, you have also have shown and made racist comments to me and disparate treatment is very evident.

I do try to resolve problems at lowest and communicate, only to get this email response or email response in the past.
Now you want me to complete a reasonable accommodations for this simple request which I will contact George Patton to complete

I am including the next line in my chain of command as your hostility towards me as well as the racist comments leads me to this so that all are aware.
I am more than willing to sit down with anyone to find resolution that is my professionalism.

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Teams

Subject: Re: Notification
Importance: High

Tonie,

I have removed Mrs. Carrillo and Ms. Tapahe from this email chain since they do not need to be part of this conversation. I have also added George Patton as I am asking him to provide me with the information on any Reasonable Accommodations that the agency has agreed to since I am not aware of any accommodations, and none have been shared with me, so I was unaware of any conditions up until I received this email. There are several issues you have raised in this email, and I am going to attempt to address them systematically.

1. I understand that the changes being made can be frustrating and difficult to adjust to. Please know that the changes are being made for the good of our patients and have been researched and are evidence-based.
2. You state in your email " I do have ADHD; the agency and you are aware as I disclosed this to you." Me and you have never had any type of conversation regarding any of your medical problems or accommodations so I am not sure who this statement is directed to, but I am your supervisor and should be the one you are having these conversations with. With that caveat being stated the Job Accommodation Network lists reasonable accommodations for ADHD to include providing of private workspace (which the agency has provided), additionally recommends providing uninterrupted work time (which can be accomplished but shutting your office door) the broadcast messages are not considered an interruption as they are part of your duties and requirements for accomplishing your duties. Is there anything else we can provide to assist with accommodating you? Recommendations include to-do lists, assistance with prioritization, the use of EAP and structured breaks. I am available to

discuss options if you wish.

3. Regarding notifications from inpatient case management, we had a conversation via email about this on May 9, 2022, when I sent out directives on how the inpatient case managers were to notify PCMC employees on the need for appointments for both emergency room and hospital discharges. At which time I informed you regarding this process "This is a new process and may have to be changed but we can discuss as a group to determine if there is a better more efficient way to ensure that CCC's are helping to get follow-up discharge visits scheduled prior to discharge. The broadcast serves as notice of the need of your assistance with scheduling." You stated there was not a reason to have a conversation regarding the process, specifically you stated, "Why would we discuss this in a group when a process has been used in the past?" I informed you that this was a management directive that was expected to be followed. You have not made any mention of this directive again until today when you sent the initial email to Ms. Carrillo and she informed you that she was following the directions given to her by me on how to contact CCC's and the Empanelment nurse (which are still the same as when we discussed this on May 9, 2022 at the time you said that this directive "this seems more of harassment, bullying not assisting patients, and if prevents me from doing my job. I don't get this broadcast action from any other PIMC or PCMC team member." I explained that the current processes were not working, causing patient delays, and must be changed. The process is the same for the other RN's in PCMC and is not any different from what you are being asked to do and is the equitable expectation of your position and all Clinical Care Coordinator positions.
4. You state that if you log off then the broadcast goes to others currently logged in. I have used EHR for 11 years and never seen this occur. Can you please provide more insight so I can have our informaticists investigate this as if occurring it would be a HIPAA issue that will need to be addressed across all IHS if we can recreate the issue. I would like to inquire as to why when I sent out general information on May 12, 2022, again instructing staff to use broadcast or telephone as some employees were putting PHI/PII in skype messages which we have be told is unsecure and not allowed. Additionally, since we must use a separate email to send information encrypted that broadcast is the most efficient and secure manner of having discussions regarding patients and provides an audit trail as to what occurs. Why did you not mention this issue then? Broadcasts stay until closed and can be moved around so as not to interfere with any other work being done.
5. There would not be evidence-based material (EBM) on the use of broadcasting in our EHR since it is proprietary to the government however there is a plethora of EBM on the use of broadcasting to improve communication between teams, patients, and families. I am willing to assist you in finding some of the most current EBM regarding broadcast messaging in the ambulatory setting.
6. You responded to information I sent out on May 6, 2022, regarding BPRM and the scheduling of patients and claimed that you were being required to take on additional duties not in your position description and blaming other individuals that do not have any say or control in how I am running primary care. I responded to your questions as requested and explained my philosophy and my expectations for the CCC's and how AHRQ considers care coordination to be a necessity to properly care for our patients. I explained the philosophy I am trying to instill at PCMC as "Our philosophy is to help our patients achieve the highest level of wellness and independence. By working together with other team members, we can meet our patients' and family's' healthcare needs. If we are saying that is not my job, then we are not focused on the patient." As stated in my email, this may be temporary, and

some duties as assigned are due to staffing issues. At times your email responses have the appearance of being hostile and threatening in tone and demeanor as previously stated when discussing your official position description and I informed you that the position description for Clinical Care Coordinator (PCMC) on page 2 paragraph 2 beginning on line 7 states that the CCC "Assists with obtaining lab results, medical tests, discharge summaries and other information within the hospital and other facilities and assists with arranging appointments, procedures and discharge planning." To wit you did not respond or request clarification. This email was the first mention of the issue again.

7. The response to Ms. Carrillo has the appearance of being unprofessional, rude, and hostile. I have sent these types of emails in the past and have had to learn from them and how to make changes so as not to give that appearance and I can provide you some of the advice and tips given to me to assist you in avoiding making some of the same mistake I made. On May 5, 2022, I asked you that when there were issues "In the future, please send these types of issues to me or just me and leadership" and not to involve others unnecessarily as it creates a hostile work environment and creates more issues than just the subject you are addressing. I again ask not to include entire buildings or departments when there is an issue especially since there are numerous changes occurring rapidly and you may not be aware of the bigger picture. As stated, several times since I took over PCMC on March 28, 2022, I value your input and insight to the way things are occurring, I am asking that in the future you give me an opportunity to explain my rationale and rectify any issues or perceived issues without involving others.

I hope I have answered all your questions and concerns. As always do not hesitate to contact me if there are any further questions or concerns in which I can assist.

Very Resptfully,

Hon. Kevin D. Turnage MSN Ed. RN, AMB-BC, NHDP-BC, NPD-BC

Subject: RE: Notification

You are sending the Un-assigned team, and the algorithm has Brenda Barr, but you sent me request which I scheduled the appointments. I lost one broadcast appointment today, **which I found when I did the ICARE ER/HOSPITAL F/u** whereas Roxanne did schedule the appointment.
You put Un-assigned patient in a notification and I completed the task. I zone in on new notifications from others who do not work at primary care medicine clinic.

HIPAA compliance, if you or anyone sends a notification and I log off on the Electronic Health record the patient's identification goes to anyone who is logged onto the Electronic Health Record, and it shows the patient's identification chart number and the illness.
All can disagree with my pointing this out but not everyone logged into Electronic health record is a **"Need to Know".** This is under HIPAA compliance under the Indian Health Manuel and under HIPAA rules & regulations.

Sending broadcast after broadcast is not faster getting any appointments but it blocks me from performing my job**, there is no evidenced based literature or data** to support this type of scheduling appointments.

I do have ADHD, the agency and you are aware as I disclosed this to you. Professionally I asked all of the inpatient case managers to send a notification or call me, I do answer my phone and if I am on with a patient , I return calls.
Your discriminating against me, it's a form of harassment (non-sexual) since I asked you not to do this, but you continue to do so.

I also have (2) panels 8 to 10 doctors, providers that I am working with daily on phone or even person I huddle with team members.

Thank you for responding;

Respectively,

Tonie Greve RN CCC Silver & Ocotillo Team

Subject: Notification

Good Morning Rebecca;

I lost the broadcast information you sent, again I cannot express how easily this happens.

Professionally, I do not work daily by getting broadcast after broadcast, that is not how I was trained nor work daily at Primary Care Medicine Clinic, by doing this repeatedly, you are forcing the way you work onto me without consideration.

Can we find common ground to assist the patients we serve here at Phoenix Indian Medical Center? These actions are more bullying and intimidation.

Can we collaborate and work together? I do have (2) panels and work with (8) doctors daily, as well as get notifications for the Un-assigned team, and the Specialty Clinic.

If the patient is not heading out the door, a notification can be reviewed and an appointment made. I have repeatedly scheduled appointments only to find out the patients were not discharged and the dates of the scheduled appointments do not fall within the 7-10 days.

I review the notifications throughout the day zoning in on the request from persons that do not work at primary care medicine clinic, and it is very distracting when I get broadcast instead of notifications especially when on a phone with a client and typing verbatim what the patient is saying my normal reaction is to delete the broadcast.

I am asking you once again professionally, can you put the request in a small notification, or call me, the broadcast has no information other than needing an appointment.

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Teams

CC: Lee, Candace S. (IHS/PHX)

Good Morning Kevin;

I am getting broadcast from Case Managers who all sit in the same room, at the same time, some patients don't have a discharge date.
I am getting broadcast from Inpatient team members, don't know names that Rebecca informed them to broadcast me as I am 3rd on the list.

I get broadcast for Agave Team Doctors, Coral Team Doctors, unassigned team providers and locum doctor as well as the (2) Silver & Ocotillo Teams.

I don't know if I am seeing the same algorithm that lists only me as the contact person for the whole Primary Care Medicine Clinic.

Please Clarify.

Respectfully,
Tonie Greve Rn CCC Silver & Ocotillo Teams

Subject: Notification

Good Morning Rebecca;

I lost the broadcast information you sent, again I cannot express how easily this happens.

Professionally, I do not work daily by getting broadcast after broadcast, that is not how I was trained nor work daily at Primary Care Medicine Clinic, by doing this repeatedly, you are forcing the way you work onto me without consideration.

Can we find common ground to assist the patients we serve here at Phoenix Indian Medical Center? These actions are more bullying and intimidation.

Can we collaborate and work together? I do have (2) panels and work with (8) doctors daily, as well as get notifications for the Un-assigned team, and the Specialty Clinic.

If the patient is not heading out the door, a notification can be reviewed and an appointment made. I have repeatedly scheduled appointments only to find out the patients were not discharged and the dates of the scheduled appointments do not fall within the 7-10 days.

I review the notifications throughout the day zoning in on the request from persons that do not work at primary care medicine clinic, and it is very distracting when I get broadcast instead of notifications especially when on a phone with a client and typing verbatim what the patient is saying my normal reaction is to delete the broadcast.

I am asking you once again professionally, can you put the request in a small notification, or call me, the broadcast has no information other than needing an appointment.

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Teams

You are sending the Un-assigned team, and the algorithm has Brenda Barr, but you sent me request which I scheduled the appointments. I lost one broadcast appointment today, **which I found when I did the ICARE ER/HOSPITAL F/u** whereas Roxanne did schedule the appointment.
You put Un-assigned patient in a notification and I completed the task. I zone in on new notifications from others who do not work at primary care medicine clinic.

HIPAA compliance, if you or anyone sends a notification and I log off on the Electronic Health record the patient's identification goes to anyone who is logged onto the Electronic Health Record, and it shows the patient's identification chart number and the illness.
All can disagree with my pointing this out but not everyone logged into Electronic health record is a **"Need to Know".** This is under HIPAA compliance under the Indian Health Manuel and under HIPAA rules & regulations.

Sending broadcast after broadcast is not faster getting any appointments but it blocks me from performing my job**, there is no evidenced based literature or data** to support this type of scheduling appointments.

I do have ADHD, the agency and you are aware as I disclosed this to you. Professionally I asked all of the inpatient case managers to send a notification or call me, I do answer my phone and if I am on with a patient , I return calls.
Your discriminating against me, it's a form of harassment (non-sexual) since I asked you not to do this, but you continue to do so.

I also have (2) panels 8 to 10 doctors, providers that I am working with daily on phone or even person I huddle with team members.

Thank you for responding;

Respectively,

Tonie Greve RN CCC Silver & Ocotillo Team

Good Afternoon Team Leaders;
thanks for responding;

Yes I understand the need to contact the doctor/providers for double booking, very time consuming, doesn't work. I do offer any open clinic slot to get the hospital f/u.

The patients return call that they need to f/u with their PCP as told during hospital f/u visit, they are only seen for the 1 visit hospital f/u, if they need medication refills they have to f/u with their PCP. This upsets the patients not to mention many don't get paid when not working, they do not get sick leave, so it is understandable how they express themselves. I listen and give empathy.
Education is provided on the 2 week out scheduling system.
I am then re-scheduling appointments or waiting past the two weeks to re-schedule, this again is very time consuming. There are times I have to send it to the medical assistants to assist the patients, or my day will be doing nothing but scheduling.
I do have two full teams of doctors/provider as well as get calls to assist the Un-assigned team.
I carry out the increase load, and explaining the system process problems.
I am also getting critical lab results calls, this system process is new to my list.

We are missing 2 Medical assistant positions. Ngo ,Delgado-Thai so maybe the system process will improve.

Respectfully,
Tonie Greve Rn CCC Silver & Ocotillo Teams

Subject: RE: Clinic Access

Hi Tonie,

Thank you for your questions. I understand your frustration – I know you are only try to help the patients and provide them with optimal care. We are currently set to 75% in person, 25% phone. There are multiple reasons for this – there are patients who prefer phone due to convenience/distance, we have covid/respiratory patient follow-ups that need to be completed, many chronic care visits (eg DM2 management) can be done via telehealth and CMA short staffing is part of the reason as well. I do not foresee going to 100% in person visits until our CMA staffing improves and covid numbers are on the decline again.

Hospital d/c f/u can be done either in person or phone– depending on patient preference and your clinical judgment as to what patient needs. PIMC hospital discharges should only be 30 minutes – that might help you to schedule more into available slots. I'm not sure what you mean that you don't have double booking privileges – we should not be double booking for any reason, only if the provider requests/approves it. If you

mean overbooking into blocked slots, those should also get provider approval before that happens. If I'm still not understanding, please stop by and we can look at schedules together with Kevin.

Thank you!

Subject: Clinic Access

Good Morning Kevin;

Please clarify for me;

I am seeing the appointment BPRM scheduling package list;
telephone appointments 75%
in person appointments. 25%

The doctors/providers are allotted so many of the type of appointments.

Now when the telephone appointments are booked up the in-person appointments are being used.

Problem: this prevents clinic access to those who are in need of appointments.
What is the purpose for having the two different types of appointments?
Do you know when the telephone appointments will be removed to go back to all appointments being in-person?

I don’t have the double booking capabilities as the medical assistant when the inpatient case managers are looking for appointments for discharge f/u. (this is the domino effect I was talking about)
What this causes is patient’s being scheduled with other doctors/providers only to have to make another f/u with their PCP for ongoing continuity of care after being seen **only for the hospital discharge.**

Subject: Inpatient Case Management

Good Morning all,

Recently there have been some issues noted with inpatient Case Management (ICM) getting appointments for patients that are being discharged from inpatient. After meeting with Carolyn, we have developed a plan on how this process will work. Please keep in mind this is a new procedure and may only be temporary but with the current staffing situations, this is the best possible process that will help to delay in patient care.

Subject: Contact Representatives
Importance: High

Good morning,

On more than one occasion now there has been clinic staff directing front desk contact representatives on what they should be doing and how to do their positions. Please remember that the staff at the front desk are all new to primary care and are still learning processes. With that being said if you have an issue or perceive an issue with the contact representatives at the front desk do not give him direction or tell them what they need to be doing. These issues must be brought to leadership and we will correct issues or discuss problems with the representatives. The contact representatives are not medically trained and cannot triaged patients or determine if they need to go to the emergency room or not. This seems to be happening more and more and needs to not happen again. If there is, an issue with other staff such as Front Desk, MSA's etc… please bring those to Leadership and let us deal handle them. I know you all are trying to help but are not aware of the big picture and issues being discussed with department chiefs. There are numerous issues occurring that are new to all of us as we try to transition back to a fuller schedule post COVID. What occurs in these situations is staff are told different things by different people or they are told that is not within their scope and it can cause even more issues. If there are any questions or concerns please come see me and we can discuss.

Date: Thursday, June 2, 2022 at 8:29:16 AM Mountain Standard Time
From: Greve, Tonie (IHS/PHX)
To: Turnage, Kevin D. (IHS/PHX)

Good Morning Kevin;

I am getting calls from the Inpatient Case Mangers for hospital discharge, no definite discharge date noted, nothing in the progress notes, or from the attending doctors.

Patients are scheduled appointments due to the Case Managers calling wanting them scheduled even though no discharge is planned.
This blocks clinic access to other patients. Unsure who cancels the appointments, sometimes they are still in the scheduling package while patient is hospitalized.

Solution; Can the Inpatient Case Managers call with the date of discharge noted from the attending doctors/provider?

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Teams

Good Morning all;

When the patient is placed on the waiting list the patients in the past were called to update them, or if patient presented in person wanting to be assigned a PCP they were updated at that time also and a note was entered into the electronic health records, with no time frame other than they would be called when they were going to be scheduled an appointment.

Just my input and I believe it is in the old SOP.

Respectfully,
Tonie Greve RN CCC Silver & Ocotillo Teams

Subject: RE: Panel Management Flowchart

Hi all!

Finally had a chance to review. I don't think we notify pts when they are placed on waiting list, but they are aware when a consult has been placed for them. It's so difficult to anticipate how long they will be on the waiting list, so may be best not to give an estimate.

Is there a separate branch to indicate what happens when pt doesn't keep their appt?

Thank you!

Aimee Baek, MD
Chief of Primary Care
Phoenix Indian Medical Center

Subject: Panel Management Flowchart

Please review updated flowchart and let me know if there are any changes. I did add one question or noticed one Gap. Nowhere is the patient notified of being placed on the waiting list and estimated time before empanelment. This can be a discussion for next meeting or you can send me your thoughts.

Thank You all for what you do!

Good Morning Team Leaders;

I am seeing more patients being scheduled appointments at primary care medicine clinic who do not have CIB cards on file and are not eligible for service per policy, rule, regulations.
All patients can access the emergency department per EMTALA is my understanding.

Has the eligibility requirement been changed at Indian Health Service?

Please assist.

Subject: Re: E-Comp

So what I was told is once the EComp is filed and the supervisor completes their part then it is sent to the Department of Labor. Any further communication regarding it is supposed to go directly to the employee. I would check with Tim Poorbaugh when he returns from leave to see if he can get any updates.

Date: Thursday, May 12, 2022 at 3:01:27 PM Mountain Standard Time
From: Greve, Tonie (IHS/PHX)
To: Turnage, Kevin D. (IHS/PHX)

Good Afternoon Kevin;

I am seeing clinic appointments scheduled for persons who do not have a CDIB on file.
Eligibility requires persons to be an enrolled member of a federally recognized tribe AI/AN tribe or descendants by proof of documents.

As Federal Employee I am required to report that this practice is not being followed.

Can this Federal Policy be reviewed with all staff scheduling persons in the Primary Medicine Clinic?

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Teams

Good Morning Kevin;

I have completed a Legal Documentation a training provided by Rockville Maryland Indian Health Service Headquarters, is why I asked about any new training.
You referenced all Doctors, Providers and Nurses in the email.

I asked the question about approved abbreviation, and have looked up the policy in the Phoenix Indian Medical Center but can not find the list. Instead your attacking me for unknown reasons.

"Also let me know if you are refusing to follow this management directive" where in my question meant I am refusing a directive?

I asked a question and you attacked me. From now on I will read your emails and acknowledge by your receipt you send.
From your response I am now too afraid to ask any questions from my direct supervisor. I am now afraid of you and how you will treat me by asking a question.

Respectfully,
Tonie Greve RN CCC Silver & Ocotillo Team.

Subject: RE: Observations and Corrections
Importance: High
Sensitivity: Confidential

This is not legally acceptable and is not evidence based. Please provide any documentation that is instructing you to put inappropriate materials into the patient charts. This is a management directive not a policy as it is standard evidence based practice, there is no IHS policy or IHS manual that I am aware of that states to chart in this manner as it is contrary to standards of practice. The use of staff names are acceptable in a chart if that employee completed a task for the patient that you are charting about but it definitely is not appropriate to blame and accuse in a patient's chart . I would refer you to "Recommendations for Nursing Documentation: Guidance for Registered Nurses" from the American Nurses Association. No new training is needed, as a professional RN, you are expected to remain current on evidence-based practice and the specifics of properly charting is included in that practice and standard. If an individual removes their name from a note, it is still available in the audit showing who logged in and removed the name. EHR is a certified system and everything done within the system is included in the audit trail. Please provide me the documentation you are referring to before the close of business today. Also, let me know if you are refusing to follow this management

directive.

In response to your questions.

1. There will not be a policy on legal documentation as by definition a medical record is already a legal document.
2. We can find you training to attend if you need additional training on what is considered proper documentation and feel that you cannot meet the standards of practice.
3. For most current policies including medical abbreviations you should refer to PolicyStat like you are supposed to do to verify any policy at PIMC.

Good Morning Kevin;

This need much more explanation, the past practice and training had instructions to list the name of the person in the note due to persons removing his/her names when a notification occurred.
I have been instructed to put in the persons name from Management Personnel.

Will there be a policy and or training for this Legal Documentation?

I do have a question since you are doing chart reviews;
What is Phoenix Indian Medical Center/Primary Care Medicine Clinic approved Abbreviations?
I have asked this in the past, a CMS requirement where many times I read the notifications and do not know what the writer is referencing, it looks like text messages in the permanent health records I have asked upper Management this question in the past as well.

Respectfully,

Subject: Observations and Corrections

Good Morning all,

There have been a few issues noted as occurring while doing chart reviews and reviewing process flows. It has been noted that many staff are sending PHI/PII through Skype, which is a violation and cannot be done. Additionally, I have seen sticky notes being left for employees this is not ideal and should be done via the notification within the chart as it increases the risk of the request being lost and not followed through. One other thing I have noted is many employees are listing specific employee names in the chart, for example something like “Kevin can you call the patient”. I would recommend for good documenting practice that it not be directed to a specific name in the note itself the person added as a signer will know that it is directed to them and does not give the impression that only that person should complete the task if someone else is covering for them and their notifications. I am sure more concerns will arise as monitoring and reviews continue to happen but I prefer to address these issues as they arise and not wait until we have a long list. I hope I explained these concerns well enough, if not, please reach out to me.

Do I communicate with all Phoenix Indian Medical and Primary Care Medical Clinic in this manner?

I have a note earlier from Mr. Leslie Wilkie who put in a small note and included the PCP-medical assistant-CCC at 06:05, this way I can open the notification and assist the patient and this process has been established for years here at both PIMC/PCMC.

When they broadcast and I am on the phone with a patient documenting what is being said, it stops me from communicating with the patient on the phone.
All Three Case Managers sent notifications at the same time.

Why would we discuss this in a group when a process has been used in the past?

Now I have to call each Case Manager back hopefully they answer their phones so I can get the patient identifier's to assist the patients.

This seems more of harassment, bullying not assisting patients, and if prevents me from doing my job. I don't get this broadcast action from any other PIMC or PCMC team member.

Example: It is like you are speaking with a team member and I barge through the door and tell you I need something now, this interruption is not professional and you would not tolerate this from me, and would correct the conduct immediately.
Now your response is to ignore me and allow this unprofessional conduct to impact my daily work duties.

Respectfully,

Tonie Greve RN CCC Silver & Ocotillo Team

Good Morning,

This is a new process and may have to be changed but we can discuss as a group to determine if there is a better more efficient way to ensure that CCC's are helping to get follow-up discharge visits scheduled prior to discharge. The broadcast serves as notice of the need of your assistance with scheduling.

Good Morning Kevin;

Michelle Preston-Rebecca Carrillo-Leslie Wilkie.

I am getting broadcast from the inpatient case managers for patients needing appointments, there is no note that includes me to assist.

Sending broadcast clogs up my Electronic Health Screen when I am in the middle of documentation while speaking with patients on the phone.

When I try to complete assisting the patients I have to click on the broadcast which I will lose the request of these case managers.

This is a new process one I have never had dealt with in the past, can you review this, as why this process is being done?
I included the (3) case managers names.
I have lost the requested information while doing my charting in the electronic health records.

This is not standard practice, nor process for which I have ever seen at Phoenix Indian Medical Center or Primary Care Medicine Clinic.

Respectfully,

Tonie Greve

Yes,
all have the same requirements, Medical Assistants, Clinical Rn/Triage Nurse PCMC, Inpatient Nurses, Case Managers.

Please share this response with Angie Dickerson, and Candace Lee.

Angie knew of the problems of Medical Assistants not answering their phones, this has not changed since Carolyn was acting SCN.

I too can not reach the medical assistants when discharged patients need f/u appointment. **Slots are filled with DEMO patients**.

Many Medical Assistants do not answer their phones, voice messages are full, listed office extension phones no answer, or voice message set up. I have even tried to skype, or broadcast I can not reach the medical assistants.
I just wanted you to know this.

I did huddle with Liz and she notes clinics are filled up for the 2 week schedules too. She waits for the Medical Assistant to schedule.

Thank you

Subject: RE: Inpatient Case Management

Tonie,

Thank you for bringing me your concerns and questions. I am looking into what the CCC's are currently doing and seeing if there are functions they are doing that can be reassigned. However, a PD is not intended to be an all-inclusive document containing all of the duties or responsibilities that could be assigned to a particular position. This is not a change to your PD, nor is taking care of a patient only the job of a CMA. All staff need to put the needs of the patient first! You are encouraged to provide input (written or verbal) to me when changes in duties, responsibilities, tasks, functions, processes, and/or technology may have significant impact on your position so we can discuss. The Agency for Healthcare Research and Quality (AHRQ) describes care coordination as: deliberately organizing patient care activities and sharing information among all of the participants concerned with a patient's care to achieve safer and more effective care. The AHRQ emphasizes that care coordination necessitates communicating the patient's needs and preferences at "the right time to the right people." The information must be shared and used in a secure manner and in a way that provides "effective care to the patient." The need for care coordination continues to be an important factor in patient

outcomes.

Care Coordinators' goals are to:

- Ensure a safe transition when a patient leaves the hospital.
- Assist in coordinating a 3-5 day post-discharge appointment after discharge from facility.
- Relay any important information in treatment plans to provider.
- Prevent re-admissions to the hospital, which normally happen within the first 5-7 days of discharge
- Work with patients face-to-face in the hospital and office. Phone calls are made to educate and discuss patient illness, medication changes, transportation or home safety needs and discharge goals.
- Meet face-to-face with hospitalists, physicians, or clinicians to determine the appropriate plan of care to help prevent high-risk re-admissions.
- Provide services needed after discharge.
- Facilitate access to the primary care physician, specialists, ancillary providers, or to make special arrangements such as Home Health Care, Physical Therapy, Occupational Therapy, Speech Therapy, Palliative Care or Hospice.

Our philosophy is to help our patients achieve the highest level of wellness and independence. By working together with other team members, we are able to meet our patients' and family's' healthcare needs. If we are saying that is not my job then we are not focused on the patient.
As stated in my email, this may be temporary and are duties as assigned due to staffing issues. When can review the duties of a CCC and the requirements if necessary. The answers to your questions are noted below.

Subject: RE: Inpatient Case Management

Good Morning Kevin;

The (2) CCC will be responsible for **doing the official duties of the Medical Assistants (15) - the Medical Staff Assistants (3)- Nurse Assessment/Nurse Triage (2)?** The CCC's will be responsible for other duties as assigned.

Will the Union be contacted for this change in Official Duties to the position Description? This is not a change to official duties and a PD is not intended to be an all-inclusive document containing all of the duties or responsibilities that could be assigned to a particular position. So no Union was not notified as it is not required.

Prior there were (3) CCC and (1) CCC/CM position, now Liz and I have had to increase our case load.
1) CCC is on extended leave.

Carolyn is wants to increase the work load more? This was my idea and decision based on the needs of the clinic, patients and current staffing needs.

Respectfully I am asking these questions why only the (2) PCMC team members continue to take on the official duties of other staff members.

1. Problem, the Medical Assistants have the BPRM blocked with Demo Patients in the clinic slots. If there is a Demo patient in the slot it should be corresponding with a telephone appointment. If it is not notify me and I will work on that being corrected.

2. This makes it hard to schedule any appointments, which means I have to call, broadcast, skype Medical Assistants to get an appointment scheduled. No you find the next available appointment slot and schedule the appointment.
   Are you saying that we will have full authority to double book? This was not even mentioned, So No this is not what I am saying.
3. If slots are filled out for 2 weeks does this mean we use the yellow walk-in slots to get the appointments filled? If you truly cannot find an appointment in two (2) weeks then reach out to leadership and we can assist.
4. No Doctor/Provider will call to complain if patients are double booked? I cannot control what other people say and what they do. So, no I cannot say that there will not be any complaints.

Respectfully,

Tonie Greve RN Silver Team/Ocotillo Team

Subject: Inpatient Case Management

Good Morning all,

Recently there have been some issues noted with inpatient Case Management (ICM) getting appointments for patients that are being discharged from inpatient. After meeting with Carolyn, we have developed a plan on how this process will work. Please keep in mind this is a new procedure and may only be temporary but with the current staffing situations, this is the best possible process that will help to delay in patient care.

1. Problem, the Medical Assistants have the BPRM blocked with Demo Patients in the clinic slots. If there is a Demo patient in the slot it should be corresponding with a telephone appointment. If it is not notify me and I will work on that being corrected.

2. This makes it hard to schedule any appointments, which means I have to call, broadcast, skype Medical Assistants to get an appointment scheduled. No you find the next available appointment slot and schedule the appointment.
   Are you saying that we will have full authority to double book? This was not even mentioned, So No this is not what I am saying.
3. If slots are filled out for 2 weeks does this mean we use the yellow walk-in slots to get the appointments filled? If you truly cannot find an appointment in two (2) weeks then reach out to leadership and we can assist.
4. No Doctor/Provider will call to complain if patients are double booked? I cannot control what other people say and what they do. So, no I cannot say that there will not be any complaints.

Respectfully,

Tonie Greve RN Silver Team/Ocotillo Team

Subject: Inpatient Case Management

Good Morning all,

Recently there have been some issues noted with inpatient Case Management (ICM) getting appointments for patients that are being discharged from inpatient. After meeting with Carolyn, we have developed a plan on how this process will work. Please keep in mind this is a new procedure and may only be temporary but with the current staffing situations, this is the best possible process that will help to delay in patient care.

Hon. Kevin D. Turnage RN, MSN Ed. AMB-BC, NHDP- BC

Good Morning Kevin;

The(2) CCC will be responsible for **doing the official duties of the Medical Assistants(15) - the Medical Staff Assistants(3)- Nurse Assessment/Nurse Triage (2)?**

Will the Union be contacted for this change in Official Duties to the position Description?

Prior there were (3) CCC and (1) CCC/CM position, now Liz and I have had to increase our case load.
1) CCC is on extended leave.

Carolyn is wants to increase the work load more?

Respectfully I am asking these questions why only the (2) PCMC team members continue to take on the official duties of other staff members.

1. Problem, the Medical Assistants have the BPRM blocked with Demo Patients in the clinic slots.

2. This makes it hard to schedule any appointments, which means I have to call, broadcast, skype Medical Assistants to get an appointment scheduled.
   Are you saying that we will have full authority to double book?
3. If slots are filled out for 2 weeks does this mean we use the yellow walk-in slots to get the appointments filled?
4. No Doctor/Provider will call to complain if patients are double booked?

Respectfully,

I will make sure it is changed. In the future, please send these types of issues to me or just me and leadership not to the entire building so that it does not cause additional issues. I appreciate you sharing the information but now I have staff emailing me wanting to change their Tour of Duty and asking if all RN's schedules changed.

On the daily assignment sent out my Michelle Moreno

I just clipped a small portion for view.

I get cold calls sent to me from across campus, sometimes I stay to take the calls, or when I return the next day the calls are on my voice message. I then return call to patient or outside vendors to update them on the

team members and fax number contact information.
I think when those on the email automatically think I am here until 4:30 so that is why they transfer the calls.

I was just sharing

Thank you.

Subject: RE: ER patient follow up processes and data
Date: Tuesday, May 3, 2022 at 10:04:59 AM Mountain Standard Time
From: Greve, Tonie (IHS/PHX)
To: Hill, Elizabeth I (IHS/PHX), Turnage, Kevin D. (IHS/PHX), Barr, Brenda (IHS/PHX)
CC: Baek, Aimee (IHS/PHX), Lee, Candace S. (IHS/PHX)

Good Morning All Team Members;

Liz your absolutely right, when my official position description was the clinical RN Nurse assessment/Triage it was divided between Brenda Barr and Myself.

She would either do the hospital f/u and schedule clinic access, and I would do the ER visit f/u, this would change, and this list was not in the ICARE but in the Patient Panel Management.

The training was when the appointment was scheduled the box that had either ER or Hospital was removed, if there was a request for PCP then the information was updated in the PPM either expedited or placed on the general waiting lists.

The Un-empaneled team was followed by the (2) RN clinical Nurses. Arlene is here and was trained on this previously, but whomever is the owner of PPM will have to give her access again.

This would help unload the Unassigned patients.

I still have my old PD with the description that listed this duty.

When I moved to the Clinical Care coordinators it was then instructed that I follow the Assigned Panel Patients but when the alarm was Orange this was put on hold by Carolyn Taphae. Now that we are in the Green Level I resumed.

Thank You.

Cc: Baek, Aimee (IHS/PHX) <Aimee.Baek@ihs.gov>; Lee, Candace S. (IHS/PHX) <Candace.Lee@ihs.gov>
Subject: RE: ER patient follow up processes and data

Good morning,

I wanted to provide feedback in capturing the ED patients after ED visit

Unassigned post-emergency room patients are captured by ED provider telephone requests through Brenda Barr RN (Unassigned Team) and patient driven self-management appointment requests.
The formation of the unassigned team has provided primary care access for patients contacting PCMC for ER follow up visits are given appointments firstly with the unassigned/float providers then are scheduled with providers with open access availability.

Empaneled post-emergency room patients are captured by the Care Team notifications and patient driven self-management appointment requests.

CCC RN Role for Coral, Agave, DJW & Unassigned Teams
Currently, my workload has not afforded me the opportunity to re-instate ER Call Backs. I am currently covering the patients on above listed teams and this task alone would take all my time due to the large number of ED users in my panels. I feel that a more care team approach as an alternative to the past work flow of CCC RN ED Call backs and data generating process would be more beneficial to the teams I cover.
Discussions on quality improvement, processes, workflow, patient education, and team roles in the management of the ED patients are great topics for the teams to brainstorm and provide feedback.

Question: Can the past data needed can be generated by I-Care by running a report of pts seen in ED for ? timeframe with report of those same patients last clinic appt? to see if they had an appt with PCMC provider?

Elizabeth Hill RN

Subject: RE: ER patient follow up processes and data

Good Morning All Team Members;

I am running the ICARE panels for ER visits, then I update my Ocotillo/Silver Team Doctors and Medical Assistants to let them know the patients will need f/u appointments, this also includes if patient is sent outbound to other hospitals in the Valley, I then call to speak with either the attending nurse that day to get update on patient and or call the Case Managers/Care Transitional Offices to give my name, reason, and contact number for return calls to assist patients with PCP f/u appointments.
This as the clinics have opened up more I believe 75/25 ratio. I was told to stop this process due to clinic access being low previously due to the Pandemic, but have resumed per my official duties and previous expectations.

Thank you

Importance: High

Good Morning,

We need assistance getting information for HQ. In addition to the information below Candace has made the following request for information:
I believe the only mechanisms we have for patients to request a follow up with a PCP is 1) via the PCP Empanelment request if they are un-empaneled or 2) patient calls the Call Center to schedule is they are empaneled. Is this accurate? I don't think the CCCs are running their iCare panels anymore and reaching out to patients? Just wondering how we can capture this data:

Number of ED patients contacted for followup PCP visit (numerator) / number of ED patients who were requested to have a scheduled PCP visit following an ED visit (denominator)

Please let me know if you are still checking your iCare panels.

Subject: ER patient follow up processes and data
Importance: High

Hi all,

We need to get some data so we can submit to Dr. Kannan. Please reference email chain below.

Here is the process the ED uses to contact PCMC and Peds patients that **WERE SEEN in the ER**:

1. If the patient has a PCP the ED provider adds the PCP as an additional signer to the note.

2. If the patient has NO PCP the ED provider adds:
    a. OVER 21 years of age: Brenda Barr, RN & another RN (sorry unsure if the name) are added as additional signers to reach out to unemplaneled patients for follow up (doesn't matter if they did follow up or not but an outreach was attempted)

    b. Peds patients: Karen Lang, RN and Adrienne Parker, RN are added as additional signers to reach out and follow up with patient.

Process for **LWBS (left without being seen) ER** patients:
1. I'm not sure for PCMC

2. Peds: Karen and Adrienne pull the list from the day prior/weekend prior via iCARE and reach out to the families to see how they are doing and if they need to be seen they can coordinate a visit in Peds.

Would we be able to meet sometime this afternoon to discuss how to get data to submit to Dr. Kannan?

Thanks!
Claire

Cc: Campbell, Brian (IHS/PHX/PIMC) <Brian.Campbell@ihs.gov>; Baek, Aimee (IHS/PHX) <Aimee.Baek@ihs.gov>
Subject: RE: LWBS callback rates

For adult primary care, a request for follow up for an un-empaneled patient is generated via the consult for PCP empanelment request. If a patient seen in the ED is empaneled, then there would not be a consult entered, but the patient advised to contact their PCP to schedule follow up if needed. The primary care teams also track their empaneled patients via iCARE, which shows ED visits and/or hospital admissions for patients on their panel.

PCMC should be able to pull data for all PCP requests. This data should be sorted by ED referral vs. post-discharge, or other locations. Per Candace, 100% of these patients are contacted (or an attempt made to contact them), but not all actually follow up. Data for empaneled patients seen in the ED and advised to follow up with primary care will probably need to be assessed by individual chart reviews, or through the iCARE data.

While a relatively low volume month, February 2022 had **3,647** ED visits, so it would take a significant amount of time to review every one; I would recommend we try and pull this information from the primary care data. An alternative may be to just look at a few days and estimate percentages from a more limited sample.

Adding Dr. Baek for PCMC.

Subject: Fw: LWBS callback rates

Good morning,

Some of you may recall the conversation on Friday regarding data for PATH on callbacks following ED visits. I spoke to Dr. Kannan late Friday afternoon and informed him that it would take a manual process to access the data PATH was requesting. Unfortunately, he informed me that Dr. Julia Sadovich at Headquarters stated that this a mandatory request. The data was originally due on April 30, 2022, and they have given us until Wednesday (5/4/2022) to provide it to PATH.

What we need is a one-month sample as follows:

Number of ED patients contacted for followup PCP visit (numerator) / number of ED patients who were requested to have a scheduled PCP visit following an ED visit (denominator)

May I have your assistance to request this sample from the primary care staff? Would this be something the Clinical Care Coordinators would do? I recommend sampling from February 2022 as our ED volume was lower in February and there has been sufficient time for any follow-up documentation to be completed.

Subject: RE: LWBS callback rates

Hi Kathy,

Yes I do imagine it will take a manual chart review, which is what the other sites did following the email request on 4/21 that I've attached here explaining exactly what we need. I completely understand that this may have been placed lower on your priority list but it is unfortunately not an optional request from PATH and Headquarters, we have to get them this data. I received it from the other sites following that email, could you give me a estimated timeframe on when you could submit yours? Again, please do not take this email as a demand or frustration on my part, because I myself have qualms with the way in which this demand was made and about its utility in improving patient, but unfortunately we do have to meet it. Sorry about that. Let me know what to tell Headquarters and PATH for your timeframe.

Best,
Vijay

Subject: Re: LWBS callback rates

Good afternoon,

I have spoken to several leaders with ambulatory care expertise. They have indicated that this information can only be retrieved by a manual case review and cannot be completed today.

If this data is anticipated to be tracked in the future, perhaps there can be collaboration with the Knowledge Management Group to identify an automated process to pull this data from RPMS or i-CARE.

Subject: RE: LWBS callback rates

Thank you both for this. There is one other piece of data that we need, by today if possible – the number of patients who the ED physician wanted PCP follow up for who received a call to arrange for that. This is the piece that I mentioned we could get from the primary care clinic staff responsible for calling and scheduling. We would ask that person how many they were supposed to call for a given month, and how many they actually called.

Can we please try to get this today if possible?

Thank you,
Vijay

Cc: Campbell, Brian (IHS/PHX/PIMC) <Brian.Campbell@ihs.gov>
Subject: Re: LWBS callback rates

Good morning,

CAPT Campbell asked me to follow up on this. What I found was that this is a process that is shared at PIMC by different departments. For example, we have a dedicated case manager in our Emergency Department. That individual is responsible for the callbacks for any patient who is unempaneled (does not have a primary care provider at PIMC) and who is over 21 years of age. I spoke to her yesterday and, for the month of February 2022, there were 45 patients who left without being seen, who were unempaneled, and who were over 21 years of age - and she contacted (or attempted to) every one of them (45/45). The designated staff in the Pediatrics Clinic are responsible for the callbacks for any pediatric patient who left without being seen, whether they are empaneled or not. The Primary Care Medicine Clinic (PCMC) designated staff are responsible for callbacks to any empaneled patient who is over age 21. The nursing leadership in those departments is extremely new, and I have not yet had conversations with them. If this is a metric that we anticipate PATH will want to review over time, it will take some time to coordinate with the folks in Pediatrics and PCMC to collect that data on a regular basis.

In summary, we do not have ready access to the full complement of callback data at the moment and can address consolidating that data in the future if that would be helpful.

Good Morning all team members;

I was wondering when the updated PCMC staff extension will be listed, I am having problems contacting team members, I do the broadcast, skype but don't get any response, and it makes it hard to complete patient care.

I also spoke with Gloria Joy Andreasen and her phone is listed under 6747 but located in the Silver team room, where Brenda J MA sits. The office phone where Joy sits is not set up with her name.

I can not get ahold of Brenda B RN or Arlene Rn either. The calls go to voice message.

Can this be reviewed?

Thank you.

following request for information:
I believe the only mechanisms we have for patients to request a follow up with a PCP is 1) via the PCP Empanelment request if they are un-empaneled or 2) patient calls the Call Center to schedule is they are empaneled. Is this accurate? I don't think the CCCs are running their iCare panels anymore and reaching out to patients? Just wondering how we can capture this data:

Number of ED patients contacted for followup PCP visit (numerator) / number of ED patients who were requested to have a scheduled PCP visit following an ED visit (denominator)

Please let me know if you are still checking your iCare panels.

Subject: ER patient follow up processes and data
Importance: High

Hi all,

We need to get some data so we can submit to Dr. Kannan. Please reference email chain below.

Here is the process the ED uses to contact PCMC and Peds patients that **WERE SEEN in the ER**:

1. If the patient has a PCP the ED provider adds the PCP as an additional signer to the note.

2. If the patient has NO PCP the ED provider adds:
    a. OVER 21 years of age: Brenda Barr, RN & another RN (sorry unsure if the name) are added as additional signers to reach out to unemplaneled patients for follow up (doesn't matter if they did follow up or not but an outreach was attempted)

    b. Peds patients: Karen Lang, RN and Adrienne Parker, RN are added as additional signers to reach out and follow up with patient.

Process for **LWBS (left without being seen) ER** patients:
1. I'm not sure for PCMC

2. Peds: Karen and Adrienne pull the list from the day prior/weekend prior via iCARE and reach out to the families to see how they are doing and if they need to be seen they can coordinate a visit in Peds.

Would we be able to meet sometime this afternoon to discuss how to get data to submit to Dr. Kannan?

Thanks!
Claire

Cc: Campbell, Brian (IHS/PHX/PIMC) <Brian.Campbell@ihs.gov>; Baek, Aimee (IHS/PHX) <Aimee.Baek@ihs.gov>
Subject: RE: LWBS callback rates

For adult primary care, a request for follow up for an un-empaneled patient is generated via the consult for PCP empanelment request. If a patient seen in the ED is empaneled, then there would not be a consult entered, but the patient advised to contact their PCP to schedule follow up if needed. The primary care teams also track their empaneled patients via iCARE, which shows ED visits and/or hospital admissions for patients on their panel.

PCMC should be able to pull data for all PCP requests. This data should be sorted by ED referral vs. post-discharge, or other locations. Per Candace, 100% of these patients are contacted (or an attempt made to contact them), but not all actually follow up. Data for empaneled patients seen in the ED and advised to follow up with primary care will probably need to be assessed by individual chart reviews, or through the iCARE data.

While a relatively low volume month, February 2022 had **3,647** ED visits, so it would take a significant amount of time to review every one; I would recommend we try and pull this information from the primary care data. An alternative may be to just look at a few days and estimate percentages from a more limited sample.

Adding Dr. Baek for PCMC.

Subject: Fw: LWBS callback rates

Good morning,

Some of you may recall the conversation on Friday regarding data for PATH on callbacks following ED visits. I spoke to Dr. Kannan late Friday afternoon and informed him that it would take a manual process to access the data PATH was requesting. Unfortunately, he informed me that Dr. Julia Sadovich

at Headquarters stated that this a mandatory request. The data was originally due on April 30, 2022, and they have given us until Wednesday (5/4/2022) to provide it to PATH.

What we need is a one-month sample as follows:

Number of ED patients contacted for followup PCP visit (numerator) / number of ED patients who were requested to have a scheduled PCP visit following an ED visit (denominator)

May I have your assistance to request this sample from the primary care staff? Would this be something the Clinical Care Coordinators would do? I recommend sampling from February 2022 as our ED volume was lower in February and there has been sufficient time for any follow-up documentation to be completed.

Subject: RE: LWBS callback rates

Hi Kathy,

Yes I do imagine it will take a manual chart review, which is what the other sites did following the email request on 4/21 that I've attached here explaining exactly what we need. I completely understand that this may have been placed lower on your priority list but it is unfortunately not an optional request from PATH and Headquarters, we have to get them this data. I received it from the other sites following that email, could you give me a estimated timeframe on when you could submit yours? Again, please do not take this email as a demand or frustration on my part, because I myself have qualms with the way in which this demand was made and about its utility in improving patient, but unfortunately we do have to meet it. Sorry about that. Let me know what to tell Headquarters and PATH for your timeframe.

Best,
Vijay

Subject: Re: LWBS callback rates

Good afternoon,

I have spoken to several leaders with ambulatory care expertise. They have indicated that this information can only be retrieved by a manual case review and cannot be completed today.

If this data is anticipated to be tracked in the future, perhaps there can be collaboration with the Knowledge Management Group to identify an automated process to pull this data from RPMS or i-CARE.

Subject: RE: LWBS callback rates

Thank you both for this. There is one other piece of data that we need, by today if possible – the number of patients who the ED physician wanted PCP follow up for who received a call to arrange for that. This is the piece that I mentioned we could get from the primary care clinic staff responsible for calling and scheduling. We would ask that person how many they were supposed to call for a given month, and how many they actually called.

Can we please try to get this today if possible?

Thank you,
Vijay

Cc: Campbell, Brian (IHS/PHX/PIMC) <Brian.Campbell@ihs.gov>
Subject: Re: LWBS callback rates

Good morning,

CAPT Campbell asked me to follow up on this. What I found was that this is a process that is shared at PIMC by different departments. For example, we have a dedicated case manager in our Emergency

Department. That individual is responsible for the callbacks for any patient who is unempaneled (does not have a primary care provider at PIMC) and who is over 21 years of age. I spoke to her yesterday and, for the month of February 2022, there were 45 patients who left without being seen, who were unempaneled, and who were over 21 years of age - and she contacted (or attempted to) every one of them (45/45). The designated staff in the Pediatrics Clinic are responsible for the callbacks for any pediatric patient who left without being seen, whether they are empaneled or not. The Primary Care Medicine Clinic (PCMC) designated staff are responsible for callbacks to any empaneled patient who is over age 21. The nursing leadership in those departments is extremely new, and I have not yet had conversations with them. If this is a metric that we anticipate PATH will want to review over time, it will take some time to coordinate with the folks in Pediatrics and PCMC to collect that data on a regular basis.

In summary, we do not have ready access to the full complement of callback data at the moment and can address consolidating that data in the future if that would be helpful.

Hello all,

Do you have ready access to the number of patients who were LWBS from the ED who received a callback from any month in 2022? It would be very helpful for PATH reporting.

Thank you,

Good Afternoon Team Members:

Sharing Information from Valley Respiratory;

New CPAP and BIPAP orders are back logged from December, it may take up to 4 months for the chips to come in, and for deliver/set up for the CPAP/BIPAP machines.

Some clients have called me and this is the information I have shared with clients and sharing with team members here at PCMC.

Thank You

Attachments: Consult for PCP request.PNG

Good Morning Team Leaders;

There are more and more patients that are being pre-assigned to PCP clinic appointment for 60 minutes at Primary Care Medicine Clinic that have PCP elsewhere.

I have included the attached for the Consults when ordering PCP request the (3) questions were supposed to be asked when entering the consult. This was also suppose to be asked when interviewing the patients when pre-assigning a clinic appointment.

I have had to change quite a few of these to Provider Elsewhere on Patient's pre-assigned PCP this is redundant and it prevents patients who have higher acuity being assigned, or clinic access for patients seeking clinic access with his/her PCP.

This process was agreed and the CAC updated the consult template.

Can this be reviewed again.

Thank you.

Good afternoon Kevin;

Thank you for this message, I look forward to education and new tools to help the patients we serve.

As a person who uses this facility for healthcare needs I welcome this patient centered care and education and f/u appointments before departing the clinic, I just had this same talk with my PCP last week as a patient of how hard it is to get clinic access and care.

Thank you

Tonie Greve

Subject: Expectations and goals
Importance: High

Good Afternoon,

I wanted to get some information out to everyone in PCMC that currently report to me.

First, I intend to foster trust, transparency, and open communication without fear of punishment at PCMC. I believe in Daily Staff Rounding and attempt to see and speak with all staff on a daily basis (Not always feasible especially in BH). Please use this time to bring up any conditions or concerns; or you may come to my office at any time. Our main concern PCMC must be the health and wellness of our patients, our primary goal is to provide the best comprehensive, and coordinated health care for patients at all stages of their life. We will be person-centered defined as "being consistently person-centered in word and deed". I want PCMC to become an example by being a regular, authentic presence at the frontline and visible champion for improvement in patient-centered care. I do not micromanage, I am firm but fair, I am not an authoritarian or totalitarian but do have expectations!

My Expectations:

- **You will work to the top of your license and scope of practice.**
- **We will ensure patients are ALWAYS first.**
    - **For every decision or action, we should ask ourselves "What is best for the patient".**
    - **NEVER say "That is not my job"**
    - **We will deliver safe highly reliable care.**
- **Each team member including myself will be held accountable at all times to ensure the best care possible to our patients, families and visitors.**
    - **Be punctual, my expectation is that you be here ready to work at scheduled time not walking in the door at your start time.**
        - **Unapproved/Un-notified tardies may receive AWOL.**
        - **Leave requests will continue to be expected two (2) weeks in advance except emergencies.**
        - **Time for unplanned leave MUST be entered at beginning of first day back at work, if not it will be entered as AWOL in accordance with the IHS manual.**
- **Listen to our patients' concerns and questions, helping them make decisions about their care.**
- **Provide timely access to medical care and same day appointments, whenever possible.**
- **Room patients within 10 minutes of check-in/appointment time.**
- **Provide care based on quality, safety and patient wishes.**
- **Send our patients to trusted experts, if needed.**

- **End every visit with clear instructions about, treatment goals and plans.**
- **Answer all patient questions and ensure understanding.**
- **Schedule patients follow-up appointments before they leave the clinic (not call to schedule of go to the front desk to schedule. If you have access schedule them do not make them jump through hoops.)**
- **Cooperation among all staff and clinicians.**

There are specific expectations for each staff role in the clinic. I plan to schedule individual meetings with all employees that report to me in the near future.

I do have a few initial goals in mind I want to share:

1. Develop and refine the skills of all staff that is required to provide effective and efficient patient centered primary care.
2. Develop effective communication skills with patients, families and other health care providers.
    a. With patients:
        i. Identify hidden agendas; recognize psychosocial issues; demonstrate listening skills with probing and clarifying; work with multi-problem patients, angry patients, and somaticizing patients.
    b. With colleagues
        i. Make concise, accurate, and well-organized clinical notes, oral presentations and hand-offs.
        ii. Treat coworkers with respect and dignity they deserve.
3. Recognize the spectrum of problems that occur in primary care and understand how to provide, continuous comprehensive care to patients and their families.
    a. Assessment of undifferentiated presentation, separating those problems that are serious and require immediate evaluation and consultations from those that do not.
4. Application of Health Promotion and Disease Prevention Strategies
    a. Learn the principles and the application of health promotion, risk factor assessment, and disease prevention interventions.
        i. Screening: criteria for incorporating a screening test and preventive measures routinely addressed in the clinic.
        ii. Risk identification.
        iii. Personal and cultural beliefs that influence patient participation in health promotion.
        iv. Patient education and techniques for counseling toward behavioral change.
5. Gain appreciation for the personal, economic, ethical, and legal issues that influence the patient and healthcare providers in primary care.
    a. Personal: balance in personal life, independent learning and self-evaluation.
    b. Economic: Managed care and core coordination
    c. Ethical: advanced directives and informed consent in the office.
    d. Legal: risk management, including communicating with difficult patients and proper documentation.
        i. I will send out evidence-based materials on documentation on a regular basis.
        ii. I will do chart audits and provide education if deficiencies are noted.

As you can imagine I am very education focused and will send out educational emails and opportunities on a regular basis. If you have process flow ideas or other changes that may help streamline care for our patients please do not hesitate to bring them to me.

I am excited to work with each of you!

Please bear with me as I adjust to the new role. Please let me know if you have any questions.

I do want to thank all of you for your assistance during the time of transition.

If I have inadvertently left anyone off please forward as I am still learning names and reports.
